### The Reason Why Ducks are Wild

There is little danger of the duck population of the prairies being greatly depleted if the experience of one "nimrod" who recently spent a day on the marshes in Manitoba, can be considered general. This sportsman fired 75 shells, costing \$3.75. His fare was \$3.60, and his hunter's license \$2.00. His bag was three ducks, or \$3.00 per duck. As there was no evidence of pellets in the birds, it is believed that they died of heart failure caused by the barrage.

### Says Revolution Ideas Prevalent

Many people in Alberta have reached such a pessimistic frame of mind, due to the financial depression, that they believe the only solution for their troubles is revolution. Robert Gardiner, M.P., president of the United Farmers of Alberta, declared at a meeting held at Calgary recently, "It is not the Red element I am talking about," Mr. Gardiner said, "In fact, I believe the Red element is in the minority in this province in regard to revolutionary ideas."

Mr. Gardiner said that he made this statement to emphasize the seriousness of the present situation in Canada. Twelve months ago, when the special session of parliament was called by the prime minister as the first step in the solution of the unemployment problem, there were 76,000 unemployed in Canada, according to the government. The same government today acknowledged that there were more than 530,000 unemployed.

"We have reached the stage for the first time in human history that we have conquered nature by machines to the extent that can supply everything necessary for the sustenance and happiness of our people with very little labor, and yet are starving in the midst of plenty," Mr. Gardiner asserted.

"The situation is most hopeful in this respect," the speaker continued. "This is not a depression created by the lack of sufficient goods to go around. On the contrary, we have a super abundance. All we need is an intelligent application to the solution of a new problem."

A revolution would do no good, Mr. Gardiner continued. There would be plenty of blood shed and at the end the people would face the same economic problem.

Mr. Gardiner declared that the depression would not end by people simply wishing for it to end. The duration of the depression rested on whether the capitalist system had reached its full development or not. If it had the depression would probably not come to an end under a capitalist system. On the other hand, if full development had not been reached, the people could look forward to an early turn in the tide.

He urged that not only the farmers organize, but every other class of society do the same so that a united intelligence might be directed upon the serious problems facing Canada and the rest of the civilized world.

### Farmer Breaks Neck

An unusual fatal accident happened to Nick Deconiak, farmer of Oyen, Alberta, on Tuesday morning. He had called at the home of Albert Johnson, near Gold Springs, and loaded a quantity of oats on his wagon and Mr. Johnson and his family watched Deconiak drive away along the highway.

Suddenly the wagon came to a stop. Mr. Johnson ran to the scene and found that one of the wagon wheels had gone into a ditch at the side of the road. The resulting bump must have hurled Deconiak from his seat, as his body, with a broken neck, was lying in the ditch.

### Hundred-Year-Old Record Broken

The Conservative party in its overwhelming victory in the recent election broke a parliamentary record which had stood one hundred years.

In 1832 the Liberal government had 370 seats in the House of Commons. Today with 608 returns available, the Conservatives had 472 of the 615 seats in the house.

### Loses Part of Finger

Mr. Donald Schoutz, manager of the National elevator, Chinook, had the misfortune, while running the machinery on Monday morning, Oct. 26, to have the second finger of his right hand almost completely cut off. He was immediately after the accident taken to Dr. Esler, Cerebral, who had hopes of saving the injured part but, on examination Wednesday morning, found that it was too badly smashed to be saved and amputated it at the joint.

### Lowest Production Since 1918-19-20

Grain production for 1931 will be the lowest since the dry years of 1918-19-20. The seed bed was unusually dry and rainfall came not only late but in less than normal amounts in the growing season in all but the northern areas of the three provinces. High winds and soil drifting caused serious damage in the southern areas of each province, particularly in Southern and Central Saskatchewan and South-Western Manitoba. Damage from rust and pests has been limited, but hail losses were serious in parts of Alberta.

Coarse grains show the smallest volume for many years, a large acreage furnishing feed only. Generally speaking, there are fair to good crops in the northern areas of each province. June rains in Alberta enabled crops to recover and poorer areas are limited to south-eastern and central portions of the province. Crops over large areas of South and Central Saskatchewan and Southwestern Manitoba have been practically a total failure, with shortage of seed and feed indicated. Central Manitoba harvested a crop of 50 per cent of average. Average wheat yields by provinces are estimated as follows: Alberta, 16 bushels; Saskatchewan, 7.3 bushels; Manitoba, 10.4 bushels.

Early deliveries of wheat graded high, and, although rain caused some deterioration in Alberta and Northern Saskatchewan recent dry weather is resulting in higher grades. Harvesting costs have been lower than for many years.

Wheat deliveries by farmers in the prairie provinces to October 20, totalled 106,000,000 bushels, which compares with 166,000,000 at the same date last year.

### Help a Good Cause

If there are any persons in Chinook or surrounding country who have outgrown clothing, particularly children's, would they please leave same at the "Advance" office? The Women's Institute is working in conjunction with the Red Cross for the needy cases and demands are heavy.

### Contributed Huge Sum To Assist Employment

C.P.R. Spent more than \$11,000,000 on new Branch Lines and station buildings and provided 351,000 days work for men otherwise unemployed. Co-operated by doing work years ahead.

Since the commencement of the existing economic situation the Canadian Pacific Railway has spent a matter of eleven to twelve million dollars in providing work for unemployed Canadians. When it was apparent in the late summer of 1930, that certain areas of southern Saskatchewan were to suffer from almost complete crop failure, the Company took upon itself to assist the people in that territory by beginning the construction of a branch line between Vanguard and Mayenne. This line would not, in the ordinary course of events, have been built for some time, and certainly not at a time when there was no crop available in that particular territory.

Mr. E. W. Beatty, Chairman and President of Canadian Pacific Ry.

But the Company desired to give employment to the farmers and their teams in the drought area. The total cost of the line is estimated to be approximately \$1,000,000, and this work is still proceeding. The Dominion Government subsequently undertook considerable work for the unemployment relief, and the Canadian Pacific was called upon to cooperate. This the Company did to the limit of its ability by anticipating works which would, normally, not have been started for a number of years. These works included a number of new branch lines, the building of a new station at Regina, some grade revision in British Columbia, and also the application on various subdivisions of new rail and new rock and gravel ballast. The total cost of these works were estimated at \$11,514,000 and, according to agreement with the Government, are to be completed at the end of the current year. It is true that the Dominion agreed to pay interest for a limited period on this capital cost, but after receipt of this interest, the Canadian Pacific will still have expended over \$10,600,000 from its own Treasury in order to improve the situation in the country generally. This expenditure has been made at a time when the Company's revenues are suffering severely as a result of business depression. This programme of work, undertaken in order to cooperate with the Government, had given 351,000 days work to individuals otherwise unemployed up to August 31st last, and at September 14th it was estimated that approximately 100,000 more working days would be furnished before the works were completed. Although the Company has succeeded in making substantial reductions in operating costs, it has hesitated to pursue this policy to the limit out of regard for the serious obligation which rests upon all corporations to give as much employment as possible. While protecting the interest of shareholders as far as is consistent with its duty to the country, the Canadian Pacific has been conservative in its application of measures which would increase the number of unemployed in Canada. Only recently, after experiencing very severe reverses in earnings, have they pared down their forces to the bare essentials necessary for operation.

# Teas are not alike try Salada flavour "SALADA" TEA

'Fresh from the gardens'

Set Your Own Standard

Most of us have seen the cartoons and read the stories appearing under the title "Keeping up with the Joneses." We have laughed over them, but at the same time exclaimed aloud, or murmured to ourselves, "What fools!"

Cainly facing, and closely diagnosing the situation which confronts thousands of us today as individuals, and all of us collectively as represented by our municipal, provincial and federal governments, must we not admit that no small part of our present financial problems are the result of conditions created by an attitude analogous to that portrayed in "Keeping up with the Joneses?"

The activeness of our present day situation may be due to other causes quite beyond our control—such as protracted drought, and consequent crop failure, leading to unemployment in urban centres—but would we not as a people, individually and collectively, have been able to withstand these shocks if, when times were prosperous and business active, we had not lived up to, and in many cases far beyond, our current income in a desperate race in which each and all were striving to keep up with somebody else?

Looking back—and it is in times like these that people are in the mood to "look back," take stock, and give heed to things that at other times when everything is forging full speed ahead they will not stop and consider—is it not possible to see that we indulged in expenditures which our actual position did not warrant but into which we plunged because of a false vanity that we must keep up with somebody else?

The old motor car although still serviceable was not good enough because somebody else had bought a new, more up-to-date, faster car; the simple, refreshing, health-giving holiday at a near-by lake we had enjoyed for years had to give place to an expensive trip to the Coast, or a winter in California, or Florida, or some Eastern city because somebody else had followed such a course; or because somebody else sent their son or daughter to university, we must do likewise, even though our boy and girl might not have similar tastes or inclinations or aptitude for the higher degrees of learning.

And these traits of character in the individual naturally have found expression in the policies of the governments we have created. Because older established, more populous and wealthier provinces, states and countries have, through the expenditure of millions of dollars, created great systems of permanent, all-weather roads, why we must do the same although still young, weak and not yet wealthy as a country. Not only roads, but our schools, our public buildings, all our public services had to be equal of those to be found anywhere else. As individuals, as electors, we demanded these things, and our governments were forced to comply with our demands or give way for those who would. We were determined to keep up with the Joneses of the whole world.

As a result the factories of the world were busy turning out not necessities alone but enormous quantities of luxuries at a fabulous cost. Stocks and bonds of these inflated industries mounted in value to dizzy heights. Everybody bought them with a view to amassing more money in order that they might buy still more luxury. Sooner or later a collapse had to come, and the Joneses of the world and their vast army of imitators are now in difficulty.

There is a lesson all may well take to heart at this time. It is this: Rightly or wrongly—and wrongly we believe, and certainly wrong in the vast differences which do exist—wealth is unevenly divided, income and earning power vary greatly from one person to another, and at different periods of a person's life. One man's standard of living and expenditure cannot safely be accepted as sound and proper by another man. While our present distribution of wealth continues, one man's loose change will be another man's extravagant folly.

Like everything else in this changing world, the social order is changing. Furthermore, it is the right and privilege of every man and woman to work for a change along lines he or she considers will be better, more just; with this limitation, however, that they must consider and respect the rights of others just as they expect their rights to be respected. Self-interest alone must not be our guide, because, in the final analysis, insistence of self-interest alone means self-destruction. And this is true of nations just as truly as it is of individuals.

George Washington once said: "Economy makes happy homes and sound nations—in it lie deep." Far better to follow this sage advice than to indulge in the heart-burning dissatisfaction of continually trying to keep up with the Joneses.

## New Appointment

Dr. C. N. Bell, Of Grain Standards Board, Has Been Supernumerated

Dr. C. N. Bell, first secretary of the Winnipeg, Grain Exchange, and recently the secretary of the Western Grain Standards Board and the Grain Appeals Board, having reached the age limit for civil servants, has been supernumerated and is succeeded in his position by Major C. J. Drake, who has been transferred from the Canadian Government Elevators at Port William.

Major Drake is well known in Winnipeg, having held an ceremonial position in the Manitoba legislature for a number of years.

British women claim to live longer than Americans, whose death rate between the ages of 25 and 64 is more than 30 per cent. higher than that in Britain.

The chemical industry is one of the most important in Poland.

## Suspect Radium Paint Is Causing Cancer

Workers Have Been Developing Disease in Increasing Numbers

Clues to the cause of cancer in radio-activity are disclosed in the final report of the New Jersey radium clock dial painters' deaths.

Lately some of these victims have been developing cancer in increasing numbers, and the report discussed the possibility that now unrecognized sources of radio-active bombardment in the human body may cause cancer. The dial painters have a form of radium emanations never before found in human beings. These are "alpha particles," heavy nuclei of atoms, travelling 12,000 miles a second, which in medical use of radium are screened off by the tubes enclosing the radium.

The report is made by Harrison S. Martland, M.D., of the Department of Pathology of Newark City Hospital, in the American Journal of Cancer. Of 18 deaths to date among women in the New Jersey plant, he says five died of cancer. He finds a sixth cancer death due to swallowing radium paint by a woman who worked on New York and Connecticut clock factories. Four more "dial" cases suspected of developing cancer are under observation.

"When your wife starts to talk does she know when to stop?" "I don't know yet; we've only been married nine years."

Building of a railway to the top of Ben Nevis, Scotland's highest mountain, is being urged.

## Becoming Serious Matter

Gasoline Being Stolen From Government Caches In North

Hundreds of gallons of gasoline have been stolen from government gasoline caches scattered in various parts of Manitoba, Saskatchewan, and the Northwest Territories during the past two years and investigations are underway by the R.C.M.P.

The theft of a few gallons of gas does not seem a very serious offence, but to the R.C.A.F. planes in their travels across the bush country it may easily enough be a matter of life and death.

Expecting to find a cache of hundreds of gallons to carry them back to civilization or on to the next stopping place, pilots frequently have found the supply buildings broken into and only a few scattered tins of fuel left.

Gasoline that cost 35 cents a gallon in this city is eagerly purchased for \$9 and \$10 a gallon "north of 57."

The cost of freighting the fuel explains the difference. Last winter a record price of \$15 a gallon was paid by a northern mining company for transporting gas to Reindeer Lake in Northern Saskatchewan.

## Hard Times In Labrador

Twelve Thousand Families Are Reported To Be Facing Starvation

Unless prompt assistance is forthcoming some 12,000 families face starvation this winter in the Button Bay district of Labrador, according to a report presented the Quebec Government by Rev. A. S. Leomyon, provincial school inspector and Anglican missionary of the stricken district. This condition was brought about by the failure of the cod fishing industry this year.

The report was considered by a cabinet meeting, at the conclusion of which Premier L. A. Taschereau said the Quebec Government will do something as soon as possible to alleviate the situation.

"We would naturally like the Dominion authorities to go 50-50 with us in providing this relief," he added.

## DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted."

"It was heartless until the happy discovery of the new wool-leather dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never used easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J.F.T., Montreal.

## A New Product

Making Of Wool Leather Is Closely Guarded Secret

The newest leather isn't leather at all. It is nothing more or less than wool. Wool-leather has been developed at the headquarters of the British Wool Industries Research Association in Leeds, England, and the process is a closely guarded secret. It looks like leather, wears like leather, is water-proof, and can be produced remarkably cheaply. The new wool-leather is excellent for coats, fur-trimmed, motor coats, and for the upholstery of cars, buses, and railway vehicles. Not the least of its advantages is that it is easily produced in any desired shade or colour.

## Proud Of Record

In the province of Vermont, Sweden, 164 farmers have received diplomas testifying to the long hereditary tenure of their lands. The record seems to be held by a family at Eda, which has farmed its lands since 1470, but another family, at Norda Entorp, has held a farm since 1480. The Swedish farmers take great pride in their family records and the new diplomas are highly prized.

The Royal Aero Club, of England, exclusively a men's club, is to admit women as guests only, and may give them full membership later.

It is useless to kick for a discount when called upon to pay the debt of nature.

## Acid Stomach

Completely Relieved by Famous Vegetable Pills

Mr. Frank C. of Blackburn, writes: "I have suffered long from acid stomach and constipation, but since being advised to try your wonderful Little Liver Pills I can eat anything." Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL-VEGETABLE and have a definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Bilelessness, Headaches, Poor Complexion. All druggists. 25c & 75c red pkgs.

## Achieved Great Success

Lord Byng Restored Public Confidence

Canadians will read with warm satisfaction the tribute paid to Lord Byng by the London Times on his relinquishing the office of Commissioner of the Metropolitan Police Force. The great popularity which his lordship gained with the soldiers under his command on the battlefields of Europe was shared by the citizens of this country when he became Governor-General of the Dominion. He was liked for his personal qualities as much as he was admired for his ability and strength of character.

When he was appointed to Scotland Yard there were some who wondered whether military qualifications were the right credentials for a police chief. Unfortunately Lord Byng has suffered much from ill-health during his tenure of office, but he has succeeded in achieving great success in the position. Certain happenings had marred the wonderful record of Britain's Metropolitan Police Department, and it was to no secure that the great commander was called. He undertook the task with his usual thoroughness, however, with the result, according to the Times, that "Scotland Yard has gained nothing less than complete restoration of public confidence in the police force and the police force has regained confidence in itself. The good which Lord Byng has done will live after him."

May he be spared to long enjoy his well-earned retirement! He has shown himself in peace and war a true commander and a great administrator.—Quebec Chronicle-Telegraph.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, delectably cool to the skin, it always results in complexion's delightful young and lovely. Indispensable to every daily woman. As a powder base for oily-textured skins or as a beautifying lotion, it is unrivalled. Tones and stimulates the skin. Refreshes, soothes, and softens and makes the hands flawlessly white.

## Recipes For This Week

(By Betty Barclay)

### CORNEB BEEF LOAF

- 1 package lemon-flavoured gelatin.
- 1 cup boiling water.
- 1 cup meat stock, or 1 cup water plus 4 bouillon cubes or 4 teaspoons beef extract.
- 1 tablespoon Worcestershire sauce.
- 4 teaspoon paprika.
- 3 cups cooked corneb beef, ground.
- 1 tablespoon onion, grated.
- 1 tablespoon prepared mustard.

Dissolve gelatin in boiling water. Add meat stock, Worcestershire sauce, and paprika. Chill. When slightly thickened, fold in corneb beef, onion, and mustard. Turn into loaf pan. Chill until firm. Unmold. Serve in slices on crisp lettuce. Garnish with sliced hard-cooked eggs or tomato wedges. Serves 10.

### Quince Honey

- 6 large quinces.
- 4 large sweet apples.
- Juice 2 lemons.
- Sugar.
- 3 pints boiling water.

Par the quinces and apples, and grate them. Measure the pulp and use three-fourths as much sugar as pulp. Pour the boiling water over the sugar and stir it until it is almost dissolved. Add the fruit pulp and lemon juice, and cook the mixture until it is clear. Pour it into clean, hot glass jars and cover with paraffin. It will have the consistency and appearance of honey.

"Don't be without Douglas' Egyptian Liniment. Keep it always handy. Relieves toothache, neuralgia, sore throat, quinsy, and croup. Invaluable for burns, sores, Barber's Itch and Ringworm."

### Crowds Hear Einstein

A huge crowd battled with police to hear Professor Albert Einstein, father of relativity, outline a new scientific theory, even though the theory concerned such a highly technical subject as the use of vectors in three-dimensional space, something understandable only by very competent mathematicians.

"Who was Samson?" The scholarship aspirant bit his pen, looking at the ceiling for inspiration, and wrote: "Samson was a strong man appointed to entertain the Philistines. He brought the house down."

Blooming varieties of begonia like plenty of sunshine, whereas varieties with spotted leaves thrive in north windows.

Lack of iron in the diet rather than lack of vitamin "G" may be the cause of pellagra.

Drought has done considerable damage to the flax crop in Italy.

Canada's Finest Cigarette Tobacco  
with ZIG-ZAG papers attached

## Mass Purchasing Needed

Production Has No Value Unless Goods Can Be Bought

Just as we had found out about all we needed to know about mass production, the whole thing was spoiled by our not knowing enough about mass purchasing! We believed so sincerely that he was the real benefactor of the race who made two blades of grass to grow where formerly there grew but one that we lost our heads completely as to the other real benefactor. Production is all very well, but there is little value in products that meet no real want. The problem of production was solved by the wise old teacher who warned his scholars that when one had food and clothing and shelter that he should be content.

Mass production had made it very difficult for some folk to face any emergency. We have heard of folks, for instance, who, year in and year out, did nothing but fill a grease cup or move a lever. Now there are no grease cups to fill and there is no need served in moving the lever. But cup filler and lever mover are now hungry.

## Make Drastic Cuts

United States Naval Expenditures To Be Reduced

With strikes cutting more than \$50,000,000 from its 1933 expenditures, the United States navy has eliminated its less important activities and has sharply curtailed many that it valued highly.

More than 3,000 civilian employees will be laid off. More than 4,000 sailors and marines will be taken from the rolls.

The Boston, Mass., and Charleston, S.C., navy yards will be closed, and so will the operating base at New Orleans, La., the naval station at Newport, Rhode Island, and the naval ammunition depot at Lake Denmark, New Jersey.

Ready-Made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Eclectic Oil. For coughs, colds, sore throat, bronchitis, asthma, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

## Canada A Good Country

Times may be "hard" in Canada in some lines, but generally speaking, this country can hold its head up with any of them when it comes to business integrity and solidity. Naturally, we cannot hope to be rid of those who are always tripping over their own feet, but these, fortunately, are in the minority. But how that minority can sometimes broadcast.

## World's Poultry Congress

Preparations Being Made To Entertain Delegates To Rome Convention

Delegates to the Fifth World's Poultry Congress being held in Rome, Italy, in 1933, are assured an exceptional opportunity for visiting. Not only will they "see Rome" during Congress week but they will be guests of the Government of Italy for an eight-day tour of the country, during which visits will be made to such interesting and historic spots as Leghorn, Florence, Pisa, Perouse, Ancona, Bologna, Ravenna, Milan, Como, and Venice. Canadian delegates will return by way of Switzerland, Germany, Belgium and France en route to Great Britain. Going routes being considered include via Paris and the South of France, via Gibraltar and Old Spain, via the Riviera, and by steamers direct to Naples with a day at Palermo. F. C. Elford, Dominion Poultry Husbandman, is again giving an active lead to Canadian participation and is glad to hear from anyone interested in attending the Rome Congress.

## Telegraphing Flowers

Television May Enable Purchaser To Actually See The Flowers

The sending of "flowers by telegraph" has for some years been a great convenience to many people, although they have been obliged largely to leave the selection of the bouquet or plant to the florist. But, according to information given out at the recent convention of the Florists Telegraph Delivery Association, television will soon enable the customer actually to see his selection of blooms and supervise their arrangement before delivery is made. Perhaps the time may come when a customer can get a whiff of their fragrance.—Christian Science Monitor.

## Will Ask Peat Survey

The Alberta Government will make a request to the Dominion Government that Dr. A. Anrep, peat moss specialist of the Federal Department of Mines, be permitted to make an extensive survey of peat moss deposits in Alberta next year. The step is being taken with a view to ascertaining the commercial qualities of Alberta peat moss for insulating and agricultural purposes.

A man's reputation is made as much by what he leaves unsaid as by what he says.

People who are too old to learn have outlived their usefulness.

Owners of radio sets in Portugal are to be taxed \$2.25 a year.

## "FATIGUE?"

I just postpone it!"

"No, I don't have 'nerves.' You can't have them, and hold this sort of position. My head used to throb around three o'clock, and certain days, of course, were worse than others."

"Then I learned to use Aspirin." "The sure cure for any headache is rest. But sometimes we must postpone it. That's when Aspirin saves the day. Two tablets, and the nagging pain is gone until you are home. And once you are comfortable, the pain seldom returns!"

Keep Aspirin handy. Don't put it away, or put off taking it. Fighting a headache to finish the day may be heroic, but it is also a little foolish. So is sacrificing a night's sleep because you've an annoying cold, or irritated throat, or grumbling tooth, or neuralgia, or neuritis. These tablets always relieve. They don't depress the heart, and may be taken freely. That is medical opinion. It is a fact established by the last twenty years of medical practice.

The only caution to be observed is when you are buying Aspirin. Don't take a substitute because it will not act the same. Aspirin is made in Canada.

Made in Canada

## STEVENS SEES BETTER TIMES FOR DOMINION

Montreal, Que.—A message of confidence and optimism was brought to a Canadian Manufacturers' Association banquet here by Hon. H. H. Stevens, Minister of Trade and Commerce.

Prosperity, based on more permanent structures than those which had collapsed in the hectic days of 1923 and 1929 awaited the country in the new epoch which opens next year, he declared.

The Minister was given an eager hearing as he pointed to certain facts and figures to support his conviction that optimism was justified. He hoped these figures would be by way of contrast with the constant comparisons published on the financial pages of daily newspapers which, he said, depicted little but the worst side of conditions.

Things were undoubtedly bad at present, but there was a silver lining, the Minister stated. His purpose was to seek to instill confidence in the country, in the people and in the future, for confidence was needed to-day throughout the world, more so than any other element in the human make-up. There was a great deal of apprehension life. There was a lack of trust apparent, unfortunately and decidedly unnecessary.

A genuine effort to stimulate internal business is liable to bring more definite results than efforts spent in external trade," Hon. Mr. Stevens said. He pointed to the year of 1929, one of high prices, in which total production in this country had been disposed of on the basis of 20 per cent. for external trade and 80 per cent. for internal trade. An increase of one per cent. in internal trade would mean an increase of \$50,000,000 whereas one per cent. increase in external trade would mean only \$12,000,000.

"I am not seeking to diminish the need for expanding export trade, but what I am seeking to impress upon your minds is the opportunity you have of making a fairly rapid expansion of the business of the country by stimulating internal trade."

Reports appearing constantly in the newspapers showing a falling price between today and the same day last year had a bad effect on the human mind, leading to an impression that all was bad, the Minister said.

"As a matter of fact it is not so bad. In the matter of export we find for the first 27 months of 1930 and 1931 that the drop this year is 28.6 per cent. It sounds serious, nearly a third, but on the comparison of prices, as between the two years, we find that the drop would be only 13.3 per cent."

Mr. Stevens called attention to the new process for building, and remarked that many parts of the main cities of Canada would have to be rebuilt. He had noted of late the trend in that direction in Montreal.

### Not Yet Learned Lesson

Many Disasters Have Apparently Failed To Impress Nations

Toronto, Ont.—Equality of sacrifice among the nations was stressed as the salvation of the world, by Sir William Clark, British High Commissioner in Canada. Officiating at the annual prize giving at St. Andrew's College, Sir William addressed the students. Looking back over a generation, "which in the last 20 years has seen so many disasters come upon it, culminating in the severest and most widespread depression which the world has known," Sir William expressed a fear that even now the nations of the world had not yet learned their lesson.

### Tidal Wave Sweeps Island

Fifty Lives Are Lost Following Severe Earthquake

London, Eng.—The office of the colonial secretary was informed that 50 lives had been lost in the destruction of 18 native villages on the Island of Cristobal in the western Pacific when a tidal wave swept the settlements following an earthquake.

The earthquake, which was severe, occurred in the central and eastern areas of the British Solomon Islands, a report from the high commissioner of the western Pacific stated.

Want Gambling Stopped

Mexico City.—Commercial organizations of Mexico, acting through the medium of the confederated chambers of commerce, will ask President Ortiz Rubio to put an absolute stop to all gambling in Mexico.

W. N. U. 1913

## Giant Aeroplane

Large German Machine To Be Used In Hudson Bay Area

Montreal, Que.—One of the largest airplanes ever brought to Canada has been taken from the hold of the "Beverbrae" and the parts conveyed to Canadian Junkers, Limited, service station, preparatory to being assembled for use in the Hudson Bay region.

The giant German plane, the first of its kind to reach this country, has an over-all length of 62 feet, a span of 95 feet, and is 15 feet high. She will be used by Canadian Airways as a freighter. She will be able to fly a distance of 500 miles with a cargo of 5,800 pounds, at an average cruising speed of 100 miles an hour.

Only two men will be needed to fly the freighter, but if it was decided to take passengers instead of cargo she could carry a total of 34 persons.

## Favorable Trade Balance

British and German Trade Shows Signs Of Improvement

Washington.—Business edged forward last month in both Great Britain and Germany.

Germany's favorable trade balance, gained through increased exports and declining imports, broke all records during that month.

The United Kingdom has a larger unfavorable trade balance than in August, but there were increases in both exports and imports.

Reports to the commerce department gave the following figures: German imports, September, 448,000,000 marks; exports, 885,000,000 marks, including reparations deliveries in total of 23,000,000 marks.

United Kingdom imports, September, 68,300,000 pounds; exports, 29,800,000 pounds, and re-exports at \$-800,000 pounds.

## Relief For West

\$50,000 Worth Of Food And Clothing Shipped To Eastern Canada

Toronto, Ont.—Since the national emergency relief committee of the United Church of Canada was formed last August, 38 carloads of clothing, fruit and vegetables, mostly from Ontario have been shipped to drought-stricken areas of the Canadian west. Details were declared to be hanging in this province has already been secured, according to officials of the committee.

Figures compiled show that a total of \$50,000 worth of food and clothing has been shipped to the prairies from the United Kingdom, British Columbia, under the direction of the relief committee. The largest total is that of Huron County, Ontario, which is now loading its eighth car.

## Unemployed Women

No Census Will Be Taken Says Government

Ottawa, Ont.—The Dominion Government will not undertake registration of unemployed women. This was made plain in a letter Senator Gideon Robertson has sent to the National Council of Women. The registration of unemployed men has proved a very considerable task. He is hopeful of obtaining much desired information from the census in this regard.

Senator Robertson's letter says "the results of the efforts to register unemployed men have been so obviously misused by duplications and men not unemployed registering in anticipation of their becoming out of work, that it seems to preclude the possibility of successful registration of unemployed women."

## Death Of A. J. McPhail

President Of Saskatchewan Wheat Pool Passes Suddenly In Regina

Regina, Sask.—A. J. McPhail, president of Saskatchewan Wheat Pool since its inception, and president of Canadian Co-Operative Wheat Producers, Limited, that is, the central selling agency, died suddenly October 21 in Regina General Hospital. He was 47 years old.

Mr. McPhail underwent an operation on September 28 for appendicitis, and since that time had been making satisfactory progress. He was to have been released from hospital the day he died.

His attending physician, Dr. Hugh McLean, stated that embolism, or the release of a clot in the blood stream, caused his sudden death.

## Floods In India

Calcutta, India.—At least 150 persons were drowned and 2,000 made homeless by floods which reached a depth of 30 feet in the viceroy's area of India. About 80 per cent. of the cattle in the area were drowned and considerable damage done to the jute crop.

## Repays U.S. Credit

Bank Of England Retires Large Portion Of Big Loan

New York, N.Y.—The New York Herald-Tribune says the Bank of England has repaid most of the \$25,000,000 90-day credit it obtained from the United States federal reserve system on August 1.

It was revealed, says the newspaper, in a major front page story, that the bank had been able to retire almost \$100,000,000 of its credit in this market.

The Herald-Tribune says further in part:

News of the retirement of four-fifths of the August credit, which matures on October 31, evoked considerable surprise and gratification here. It was regarded as a foregone conclusion that the federal reserve advance, while nominally due last week, was actually "frozen" for some time to come.

Thus, by repayment of the major portion of its credit for the federal reserve, the Bank of England has lowered substantially its foreign liabilities, thereby removing some of the obstacles which might be considered as standing in the way of an early stabilization of sterling exchange, and simultaneously the liquidity of the federal reserve system has been increased a corresponding amount.

## LEAGUE FALTERS IN EFFORTS TO ESTABLISH PEACE

Geneva, Switzerland.—Shaken by doubt of United States support and confronted by Japan's stoutly-maintained refusal to withdraw her Manchurian troops until her terms have been met, the council of the League of Nations faltered in its efforts to establish peace between China and Japan. Pacifism was so complete that a proposal to adjourn the council's special session for three weeks, without concrete action to arrest the Manchurian conflict, was debated. Observers feared that the crisis, now five weeks old, would continue unchecked.

Fate of the February disarmament conference and the life of the league itself were declared to be hanging in the balance because of the turn of events in Manchuria. Too, fear was expressed that within China itself there would be political turmoil as a result of the Geneva deadlock. Council members maintained silence concerning apprehensions about the attitude of the United States, but it was admitted that the council sized the situation up thus:

After giving the league cordial assurances of Washington's support in its efforts at pacification, and after accepting the invitation to sit with the council under the terms of the Briand-Kellogg pact, the United States Government now has evidenced unwillingness to support the move to insist on complete withdrawal of Japanese troops by a definite date, nor has the United States supported the proposal for a commission of neutral observers on the spot.

Deep regret was expressed over reports from Washington that United States Secretary of State Henry L. Stimson has assured Japanese Ambassador Katsui Debuchi the United States has no intention of participating in any program of economic pressure.

## THEY HOLD GERMANY'S FATE

In the hands of these five men a great share of the fate of Germany now rests. Heinrich Brüning (upper right), Chancellor and Foreign Minister, charged with the formation of a new cabinet, selected Hermann Dietrich (lower left), as Vice-Chancellor and Finance Minister; General Wilhelm Groener (lower right), as Minister of War and Interior, and Dr. Kurt Zol (upper left), as Minister of Justice. In the group is shown Adolf Hitler (centre), National Socialist leader.

## SEES CANCELLATION

The announcement in London of Sir Norman Angell (above), well known British economist, that he believed all war debts will be cancelled, has attracted international attention. Sir Norman stated he doubts that payments on the debts, suspended by the Hoover moratorium last June, will ever be resumed.

## Champion Cattle On E.P. Ranch Burned

Ranch Hands Battered Destructive Fire For Twelve Hours

Calgary, Alberta.—Damage totaling \$18,000 was done by fire which razed two barns on the Prince of Wales E.P. Ranch near High River, Alberta. The fire claimed the \$1,000 champion cow "Balsam Lavender," the \$800 champion heifer, "Princeton Lily," the \$600 yearling heifer, "Princeton Jessie" and seven young bulls.

Prof. W. L. Carlyle, manager of the ranch, believed that spontaneous combustion caused the outbreak. All the ranch hands battled the flames but the high wind blocked their efforts and the fire spread rapidly. For 12 hours the fire was fought before it was prevented from spreading to other buildings of the ranch. Professor Carlyle said the champion cow heifers were being prepared for the Royal Winter Show at Toronto. He said all entries would be withdrawn now because of the conflagration.

## Federal Authority Must Be Secured

Before Provinces Initiate New Undertakings As Relief Measure

Ottawa, Ont.—"All that has taken place is that various provinces and municipalities have been notified to refrain from initiating new undertakings without federal authority," Senator Hon. Gideon Robertson, Minister of Labor, declared here, commenting on western despatches to the effect that the provinces had been requested to cut their relief measures.

"We found that new undertakings were being embarked upon for which federal authority had not been secured," the Minister said. "This had to stop. We notified the provinces that such works as were already commenced could be proceeded with; but that new enterprises must have Dominion authorization. We intend to insist upon that being respected. That is all."

## Premiers Will Meet Again In November

To Consolidate Views On Problems Of Western Provinces

Calgary, Alberta.—Taking back to their respective provinces information which will be studied in preparation for another conference in November, premiers and cabinet members of the prairie provinces closed their conference here and left for their homes.

The meeting in November is being called to consolidate views of the prairie provinces and British Columbia in an effort to have legislatures of each province take uniform action on problems debated. British Columbia's representatives, absent from the last meeting, will take part in the November session.

Topics on which information was exchanged during the two-day gathering included unemployment relief, curtailment of provincial expenditures and finances generally, debtor-creditor grievances, wheat pool guarantees and gasoline prices. On the question of gasoline prices alone was any definite action taken, and this was a step towards an investigation under the Combines act.

## Slump Seen As Benefit

Henry Ford Says Depression Is a Wholesome Thing In General

New York, N.Y.—Henry Ford thinks the economic slump "has done less harm to the people of our country than a continuance of our previous false prosperity would have done."

In an interview here, Mr. Ford says "The depression is a wholesome thing in general." The condition will be broken, when people cease to believe that something can be obtained for nothing and when people get back their self-dependence, that is, when they cease to lean on the initiative of a few either to provide work or charity."

## SAYS IN RAILWAY EXPANSION MORE CAUTION NEEDED

Winnipeg, Man.—Re-adjustment of the capital structure of the Canadian National Railways "would not alter the economic position of the country one iota," Dr. W. W. Swanson, professor of economics at the University of Saskatchewan, told the Winnipeg young men's board of trade in an address in which he also warned the province of Canada for any extravagance in the building up of the government-owned railroad.

A private corporation, in debt as the C.N.R. is, might well consider some arrangement with its bondholders which might permit the scaling down of its indebtedness, Dr. Swanson said, but, he added: "It is not conceivable that the Dominion of Canada will assemble the bondholders in this case and offer a plan of reconstruction of capital which will involve their agreeing to a scaling down of the face value of their investments."

Capital readjustment of the C.N.R. "would be a trick in accounting," declared Dr. Swanson. "It would be wholly useless, except as gesture." The Winnipeg economist, who accompanied Premier R. B. Bennett to the last imperial conference in an expert capacity, thought the present condition of the C.N.R. has some value to Canadians "as a warning."

"It indicates in plain terms," he said, "the necessity for exercise of more caution in the future than has been shown in the past. It indicates the need to weigh projects of national expansion more carefully than we have sometimes done; the wisdom of making haste slowly, even in a country as rich and as capable of development as is Canada."

Dr. Swanson defended the railway's management. "Operating accounts of the system indicate they proceeded consistently along the lines of what they evidently, without protest from the public, conceived to be their mandate to meet the railway's complete needs in equipment and service; to seek for new business wherever it offered; to handle the routine operations of the system efficiently, and to draw on the Dominion treasury for the moneys necessary for these purposes."

"If as it has often been alleged, there has been extravagance in the addition of facilities, I for one shall accept my share of the blame which, as a whole, must rest on the people of this country. Cities demanding hotels, travellers clamoring for speedier service, individuals and journals applauding refinement of luxury and service—these is the Dominion of Canada made up, and they have had provided what they demanded."

## BRIAND PLAN IS NOW FOUND TO BE UNSUITABLE

Geneva, Switzerland.—Japan has refused to allow the council of the League of Nations to set a time limit for withdrawal of her troops to the Manchurian railway zone. In setting forth his position, Kenkichi Yoshikawa, Japanese spokesman, declared that his nation purposed to remove its troops as soon as security conditions permit, but could not accept a definite date.

This was his answer to a resolution by Aristide Briand, chairman of the council, suggesting the evacuation be completed November 16, date set for the next session of the council.

The Briand resolution, which is the council's formula for dealing with the Manchurian crisis, also was attacked by Dr. Alfred Sze, China's spokesman, who said it fell short of its government's desires and asked for time to seek instruction from Nanking.

Since neither of the parties to the conflict approved the resolution, the council adjourned. Mr. Briand had announced the terms of his resolution were subject to modification in public debate.

The Briand program—product of many hours of labor in private—not only called on Japan to complete evacuation by a fixed date but also requested the Japanese and Chinese governments to enter into direct negotiations to arrange the details of the troop removal.

Shanghai, China.—The unified democratic China for which Sun Yat-sen, its first president, planned and fought, seemed nearer as President Chiang Kai-shek conferred here with political adversaries who, until Japan's military invasion of Manchuria last month, were in active revolt against his government.

Simultaneously at Nanking, the capital, the National Government made public its reply to the United States note invoking the Kellogg anti-war pact. The reply promised to uphold the pact, expressing deep appreciation of "America's concern over Manchurian developments."

## Indian Conference Continues

Report To Contrary Is Ridiculous Says Premier MacDonald

London, England.—Prime Minister Ramsay MacDonald at the meeting of the federal structures committee characterized as "disgraceful falsehoods" reports that the Indian round table conference was on the verge of breaking up.

"There has been no change in the government's policy to carry the conference to a close," he said. "It is the duty of everyone concerned to work for the successful outcome of the conference."

Sir Samuel Hoare, secretary for India, described a statement credited to Mahatma Gandhi that the conference would adjourn on November 12, as "ridiculous."

"We are prepared to continue the conference as long as delegates believe a useful purpose can be served by our deliberations," he said.

Gandhi made steamer reservations several days ago to return to India next month on the grounds that Great Britain is not prepared to grant the demands of the Indian National Congress and that he was wasting his time here.

## United States Again Buys Canadian Butter

Discount On Dollar Has Made Exportation Profitable

Toronto, Ont.—"Despite a duty of 14 cents a pound, Canadian butter is again finding its way into the United States for the first time since 1927," says a special dispatch to the Toronto Mail and Empire from its Ottawa correspondent.

"The discount on the Canadian dollar in New York has done the trick." The dispatch continues, "There is a shortage of butter in the States and a surplus here, making United States prices appreciably higher than Canada's, but exportation has become profitable only since the dollar went down to an eight, nine or ten per cent. discount across the border. Not since 1927 has such export been anything but a losing proposition."

## Trade Ship Welcomed

Montreal, Que.—Hon. H. H. Stevens, Canadian Minister of Trade and Commerce, officially welcomed Australia's good-will trade ship to Canada here, at a banquet given in honor of the Australian representative by the Montreal Board of Trade, Chamber of Commerce and the Montreal Branch of the Canadian Manufacturers' Association.

## Canada Bans Gold Export

Order Now In Effect Will Operate Until March

Canada has taken official action to prohibit the export of gold except under license. The order came into effect October 19, and will continue in operation until March 1, 1932, unless sooner amended or rescinded by competent authority. Official announcement of the steps taken was made by Rt. Hon. R. B. Bennett, Prime Minister. The action taken enables this country to discharge all its obligations which are payable in gold outside of Canada, particularly in the United States. At the same time, Canada will maintain the statutory gold reserves in security for Dominion notes issued.

The order as set out in order-in-council passed and approved reads as follows:

1. "No gold coin, gold bullion or fine gold bars shall hereafter be exported from the Dominion of Canada, except under the authority of a license issued by the Minister of Finance of Canada, or by someone designated by him to act on his behalf."

2. "No such license shall be granted to other than a Canadian chartered bank."

3. "Everyone who, without a license issued by or on behalf of the Minister of Finance, as aforesaid, exports or attempts to export or carries or attempts to carry out of Canada any gold coin, gold bullion or fine gold bars, shall be liable upon summary conviction to a penalty not exceeding \$1,000 or to imprisonment for a term not exceeding three years or to both fine and imprisonment."

4. "These orders shall come into force and effect on October 19, 1931, and shall continue in full force and effect until March 1, 1932, unless amended or rescinded by competent authority."

## France Purchases Cattle

Demand In France For Canadian Breeding Stock

The movement of 173 head of Canadian cattle, valued at over 500,000 francs, on the S.S. Minotaur, marks an important new development in the export of Canadian live cattle. The impression made on arrival in France of this initial shipment was decidedly favourable, with the result that French agents are expected in Canada to purchase heifers, steers and other breeding stock with which to rebuild the seriously depleted herds of France. Canada and Switzerland are the only two countries permitted by the French veterinary authorities to import cattle into that country, and as Switzerland has absolutely no exportable surplus, the exceptional health standard of our Canadian live stock gives the Dominion an interesting new opportunity.

## All Kinds Of Weather

People In California Cannot Complain Of No Variety

One day recently in California a slight earthquake occurred at San Diego, a dust storm slowed down ships six miles at sea, and, lighting and high temperatures were experienced in other parts of Southern California.

About Los Angeles there was rain, lightning and a southeast gale that stirred up a turbulent sea. Santa Barbara rolled in a 98 degree temperature, while 20 miles away, in the Buckhorn District of the Santa Barbara forest, ice formed and heavy frost covered the hills.

## Height and Depth

The world's highest mountain rises twelve miles above the lowest ocean deep, the Coast and Geodetic Survey reports. Mount Everest, in the Himalayas, stands 29,141 feet above sea level. The deepest point in the oceans so far found is 24,300 feet below the surface of the Pacific.

Germany's wheat crop this year is estimated at 212,120,000 bushels.

"And if you ever drowned may I keep the lot?"—Lustige Kolner Zeitung, Cologne.

W. N. U. 1913

## Good Cattle Markets

Farm Lands Of France To Be Populated With Cattle From Canadian Plains

The fair farm lands of France will soon be populated with cattle born on the Canadian plains. For some years now the pastures of France have been gradually losing native stocks of cattle. High prices of meat, especially on the Paris markets, have induced farmers to sell their farm-stock and now has come the day of reckoning when they find themselves without new supplies. They need, above all, lean cattle to graze on their pastures. The rules and regulations of the French ministry of agriculture governing the importation of foreign cattle are very severe, so much so that animals from only two countries are admitted. These countries are Switzerland and Canada. Switzerland requires all her cattle for herself; therefore France can only import from Canada. This she began to do a few months ago; and from now on there should be a regular tide of arrivals of Canadian bulls, heifers and steers directed to various farmsteads throughout France.

A farmer who has a large farmstead to the north of Paris stated recently that the importation of Canadian stock is just what is wanted to give France healthy, substantial cattle. In his opinion, Canada has the best cattle in the world and the only difficulty is that cost of transport prohibits importation on a large scale. His calculation is that France could support, and gladly so, hundreds of thousands of heads of Canadian cattle. He says that climatic conditions do not seem to affect the Canadian steer on a French farm. On the contrary, the animals thrive lustily.

## Good Rule To Follow

Late Dwight Morrow Said "Don't Take Yourself Too Seriously" They say that Dwight Morrow throughout his career as lawyer, banker and statesman, adhered strictly to what he termed "rule six." And this rule simply was: "Don't take yourself so damn seriously."

It is a very good rule, so good that it might be hoped other men in high stations would adopt it as their guiding maxim. It is good because it presupposes a belief that other men may also have some knowledge, some purpose, some honesty of thought and conviction and that omniscience does not center in any one human being or in any one group of human beings. Moreover, it provides a way for meeting differing opinions but without ground than that of dictatorial domination. They say that Mr. Morrow was best known in the fields in which he had so successfully functioned as a conciliator. That, we take it, was because of the operating force of rule six. In other words, Mr. Morrow was willing to submit his views to the test of a conflict with other views and to accord to those other views the same intelligent consideration that had preceded the formation of his own. Such an approach to any unsettled problem lays the basis at the beginning for a solution of any problem in controversy—providing, of course, a solution is really sought.

For that reason it is sincerely to be desired that more of our public men should apply to themselves the Morrow "rule six."

## Characteristics Of John Bull

Englishmen Have Learned The High Value Of Courtesy

John Bull makes a bad impression on strangers because he does not care what impression he makes. He is difficult to know because he doesn't want to be known. Confirmed and contented pessimist, his wants are few; one of them is to be left alone. It is not in philosophy, science or art that his genius lies, but in the conduct of human affairs. He is a practical, unassuming Socialist. He respects that queer animal, man, and his special contribution to the slow, lumbering evolution of the human race lies in that phase of civilized life most intimately connected with a natural, healthy man's needs. The Englishman has learned, among other things, the value of quiet and the high value of courtesy and how to give way to others. These are the insignia of civilized man. So is tact and a readiness to listen to another man's opinions.—Mary Eden in Harper's Monthly, New York.

## If Anything

You can tell the English tourist, He is so sedately dressed; You can tell the Spanish tourist By the way his pants are pressed; You can tell the Canadian tourist By his knickers and the web; You can tell the American tourist, But you cannot tell him much.

Water dominoes is a new sport introduced at Catalina Island.

## ONTARIO HELPS SASKATCHEWAN

This week sees 34 carloads of Ontario fruit and vegetables start westward as free gifts to the dried-out areas through community effort organized by the United Church's Relief Committee. The top picture shows Oxford County's first car of apples and vegetables ready to start from Woodstock, Ontario, for Limerick, Ontario. Below is a picture of the first goodwill car from Ontario being unloaded at Bethune, Saskatchewan. The contents assisted 250 families in a district which is not shipping any wheat this year.

## One Cause Of Drouth

Chicago Water Diversion Plan Is Blamed For Lessened Rainfall The Toronto Star published the following despatch from Montreal:

"Primary responsibility for the continued drouth in the Canadian west, along with a host of other evils, must be laid at the door of Chicago, according to Julius McIntyre, meteorological expert and graduate of the University of Toronto."

"Mr. McIntyre asserts that the Windy City's diversion of water, which has lowered the levels of the great lakes and the St. Lawrence, has drawn off more additional water than the Mississippi can conveniently handle and has swollen the gulf stream. The result is that Europe is getting the moisture that formerly went to nourish the vast crops of the North American prairie."

"Great Britain has had little summer this year," said Mr. McIntyre, "and France has experienced disastrous floods. That flood water is moisture that should have fallen on the Canadian and American prairies if Chicago had not upset nature's equilibrium. The water that Europe has been getting in rainfall and does not want should normally have come down the St. Lawrence River."

"Mr. McIntyre pointed out that there had been worse storms in the south Atlantic than ever before experienced, while districts in the southern states and West Indies that were formerly outside the hurricane belt, now find themselves exposed to destructive visitations. The reason is that the water diversion through broadening the gulf stream has created greater atmospheric disturbances," he said.

## Long Delayed Award

A war medal has just been received by Frank Yerbury, of Bath, England, 47 years after the act for which it was awarded. The medal, which is accompanied by a pension of \$50 a year, was for gallantry in the battle of El Teb in Egypt in 1884, when he saved the life of a young soldier.

Japan will make loans to its agriculturists at low rates.

## Are You Efficient

Very Few People Could Qualify According To Following Test

Mr. Charles Runcorn, secretary of the Co-Operative Permanent Building Society, quoted the following twelve questions from the Efficiency Magazine:

- (1) "Did you ever deliberately decide to break yourself of a habit, such as smoking, and succeed in doing it?"
- (2) "Do you control your temper and not 'fly off the handle' when things go wrong?"
- (3) "Are you usually cheerful and free from 'grouchy' spells?"
- (4) "Do you 'keep your head' in an emergency?"
- (5) "Do you remain calm when your own mistakes are pointed out to you?"
- (6) "Do you ever respect your co-operate with you?"
- (7) "Can you maintain discipline without often resorting to the use of authority?"
- (8) "Can you adjust a difficulty and retain the friendship of the person with whom you have differed?"
- (9) "Can you get men under you to do things without irritating them and causing them to be resentful of your authority?"
- (10) "Are you patient when dealing with people who are hard to please?"
- (11) "Do you make it a rule not to quarrel about petty things?"
- (12) "When interviewing subordinates, do you put them at ease?"

## United States Trade Bill

Business between United States and South Africa is reported to be practically at a standstill, many firms at Cape Town finding it more advantageous to buy through London. The shoe trade particularly has been affected and a Cape Town concern, has given an order for 100,000 pairs of shoes to a firm at Northampton.

A picture postcard from a world touring father to his son in college: "This is the cliff from which the ancient Spartans used to throw their defective children. Wish you were here.—Dad."

## BONZO - - - By Studly

## Simple But Effective

Method Of African Mission Nurse Rids Village Of Man-Eating Lion

The natives in the village of Lualaba, Nyasaland, was terrorized by a man-eating lion which roamed their district, and after two villagers had been carried away in one night, they decided to obtain help to kill the beast.

There were no men around with rifles, and in their distress they turned to an English woman who combined the duties of nurse and missionary. Perhaps they put their faith in her because she had been such a friend to them in many ways, easing life's burden for them in the uncanny way that nurses and missionaries have.

So Nurse Ethel A. Hall,—we do not know whether she is entitled to those impressive letters, "R.N." or not—looked on the job of ridding the district of the man-eater. She didn't use a gun or a spear, or anything like that. She caused an ox to be killed, then injected enough morphine in the carcass to kill five human beings. Then she had the ox dragged to a place where the lion would find it. At night the lion came, ate, and shortly afterwards rolled over unconscious. Then the natives walked up and killed it. There was a triumphant procession to the village, and in token of her success the natives laid the body outside Miss Hall's hut.

And all that the records of the books of the little mission station say is: "Lion—morphine, 7s. 6d."

## Should Start Early To Guard Health

People Should Be Careful Between Thirty and Fifty

In another 25 years man may expect to live to 70 as an average age instead of 58 as now.

This forecast, from one of the world's best known medical authorities, William H. Mayo, head of the Mayo Clinic, of Rochester, Minnesota, was made in an interview at the American College of Surgeons meeting at New York.

"Man," he said, "tends to degenerate. He must take care of himself between the ages of 30 and 50 in order to live to 70."

"The idea prevails among the public that if one gets a good doctor when one is about 58 years of age one has a good chance of keeping one's health and going on living for years. Health, however, should be studied and taken care of at all times. "No new methods of treatment exist today which can benefit the mass of humanity, but by this care of health the individual learning to co-operate more intelligently with the physician, I believe that within the next 25 years man may come to the age of 70 as the average expectancy. I believe this can come through his own efforts and interest in his health if manifested earlier in life."

## Things Edison Foresaw

Prophecies Inventor Made Years Ago Have Been Fulfilled

Edison wrote in 1910: "The aeroplane of the future will, I think, have to be on the helicopter (auto-gyro) principle." Such a plane is now coming into use. He told a Toronto delegation in 1911 to use one-man cars on light traffic routes and added: "Thus, the day of one man on each car will be saved." This advice has been of late years been taken by cities all over the world. Edison invented and demonstrated talking movies in 1910; only during recent years have perfected talkies replaced the silent screen. Edison wrote in 1910 that synthetic silk would come into use, so that "every woman will be able to follow the fashions promptly, and there will be plenty of fashions." Rayon has for some time been here and another Edison prophecy is fulfilled.

## The Slow British

Achieve Another Record, This Time For Speedy Election

Holding the world's record for speed in the air, on the sea and on land, Great Britain set out to achieve a record in quick elections. Parliament dissolved on October 7 and the elections went to the polls on October 27. Only 20 days intervened between dissolution of Parliament and the counting of the ballots. Speed in holding an election is a good thing for the country. Election year in United States, under the quadrennial system is always a year of bad trade and uncertainty, owing to the election fever and to the risk of changed policies. Britain gets her fever and uncertainty over inside of three weeks.—Regina Daily Star.

The United States, it appears, has \$5,000,000,000 in gold, almost half the world's entire supply, tucked up in its vaults, where much of it is doing just about as much good as the untold wealth in gold that still lies deep in the earth.

## Valuable Source Of Radium

Pitchblende Deposits Of Great Bear Lake Of Great Bear Lake

The pitchblende deposits at La Bine Point on Great Bear Lake, Northwest Territories, constitute "a very valuable source of radium," according to the report of Hugh S. Spence, mineralogist of the mines branch, who made a study of the discoveries at that place during August of this year. In dealing with the economic aspect of the development at La Bine Point, Mr. Spence reported: "Beyond any question the pitchblende deposits at La Bine Point constitute a very valuable source of radium. At the present value of radium, one could easily mine the cost of shipment to rail—\$400 per ton. Improved transportation facilities, however, will have to be provided if serious production is to be attained."

"At present only a small gas boat drawing a 10-ton-capacity scow is available for shipment. August of this year, the Great Bear River, crossing Great Bear Lake to Fort Norman, and on to be handled several times. Large tugs and scows will be required on the lake, and a truck road or light railway is suggested as the best means of overcoming the rapidity of the rapids by a dam has been suggested but ice conditions are said to be against this."

"As regards the actual mining, the lie of the ground could hardly be improved upon, and development would be of the simplest character."

The original discovery of pitchblende in this region was made by Gilbert La Bine in May, 1930. Tests made by the laboratories of the mines branch indicated that the ore came from vein deposits that might be of economic importance and Mr. Spence was instructed to visit the locality and report on the situation.

## Indians In Danger Of Becoming Blind

Trachoma Is Spreading In Morley

Half of the population of the Morley Indian Reserve is in danger of becoming totally blind within the next few years if prompt measures are not taken to counteract the spread of trachoma, according to a recent report which was carried by the Calgary Albertan.

The newspaper says the situation is serious and that it has obtained denial that the situation was exaggerated.

"It was found that 15 children in the school at Morley are at present under treatment for the disease. About a half a dozen Indians on the reserve are already blind while about 18 more probably will become blind and cannot be helped to any great extent," the report says.

## Patronizes Home Industry

Japanese Emperor Does Not Buy Any Foreign Goods

Emperor Hirohito, of Japan, is a consistent booster for the "patronize home industry" slogan. About the only foreign products that enter the imperial palace in Tokyo are French wines and Havana cigars, and these are used only at state dinners where foreigners are guests. The emperor's western style clothing is all home spun. Some of the material is dyed silk, treated to look like wool. Even his wrist watch is a home product. It was made at Nagoya, is silver-plated and cost only \$2.35.

## Will Visit Royalty

R. P. Butchart, a resident of Victoria, B.C., with Mrs. Butchart, has accepted an invitation to be the guests of the King and Queen of Siam at Bangkok, and will leave for that country shortly before Christmas. The royal couple were guests of Mr. and Mrs. Butchart at Victoria, before leaving for their homes.

A robot distributing station of the New York Edison Company supplies power for lighting the homes of 300,000 families without the aid of a single attendant?

Pickpocket: "How many times am I to tell you that I am on holiday this week?" — Sondagssnise-Strix, Stockholm.

## Value To Canadian Agriculture Of The Chemical Work Carried On By Our Experimental Farms

For a period of more than forty years the division of Chemistry of the Dominion Experimental Farm system has been in close contact with the Canadian farmer. This has been brought about by the issue of reports and bulletins, by lectures and addresses, personal interviews and to a still greater degree by a voluminous and ever-increasing correspondence.

The information so disseminated is largely the result of investigation and research which are based upon the application of the science of chemistry to practical agriculture, and these constitute the main work of the division.

A large number of soil samples are received for examination from farmers scattered throughout the Dominion. In the report of analysis to the sender, advice is given with respect to manures, soil amendments and suitable fertilizers, etc., in this way alone hundreds of farmers every year are directly benefiting from the work of the division. From the results of carefully planned investigations the influence of continuous grain-growing has been determined and economic methods of maintaining the fertility of western prairie soils have been indicated. The extensive use of alfalfa and clover in present-day crop rotations is largely due to the early work of the division in which the manurial value of these legumes was demonstrated.

Recent years have witnessed an increasing use of fertilizers, especially in eastern Canada. Extremely valuable information with respect to the economic employment of fertilizers and liming materials has resulted from the investigation work carried on by the division on the several branch farms and stations.

Another important part of the work has been the establishing of standards for the more important feeding stuffs. Some years ago there was widespread dissatisfaction over the variable quality of milling by-products. Many were loaded with screenings with consequent poorer feeding value; injurious weed seeds were frequently present, and middlings with a low fibre content, so necessary in pig-feeding, were difficult to obtain. Standards for bran, shorts, middlings and feed flour were set, regulations regarding adulterations by screenings passed and as a result there is on the market today standardized clean, high-grade, wheat by-products. Similar work was done for packing house by-products, resulting in the vending of properly labelled material with guaranteed contents of protein, fat and bone-phosphate.

In the chemistry of wheat it has been shown that seasonal conditions — precipitation, temperature, etc. — have a greater influence on the quantity and quality of the gluten than does soil fertility. The variation of newly introduced varieties has been another phase of the work. For instance, some years ago an effort was made by interested parties to distribute in the West a variety of wheat to replace Marquis and other standard varieties. Yield, appearance and even percentage of protein in this variety were satisfactory. Gluten determinations, however, showed this wheat to possess a soft, sticky, non-resilient gluten, markedly inferior to that of such other varieties as Fife and Marquis. In consequence the distribution of this variety was discouraged.

Grain mixtures grown to produce high protein yields have been under investigation. As a result certain mixtures have been found which almost double the amount of protein per unit area formerly obtained.

The critical examination of a recently introduced scheme of pasturing calls for special comment. This system involving close grazing accompanied by judicious fertilizer treatment, has produced a herbage

rich in protein during the entire growing season and has resulted, in some districts, in saving the purchase price of commercial feeds, during the summer.

Free analysis of well water has contributed towards the maintenance of hygienic conditions through the farming districts. Thousands of samples of well water have been analyzed, pollution, alkalinity, etc., detected and remedies suggested.

At one time the export trade in pork to Great Britain was seriously affected by extreme softness of the product. Investigation of this problem proved that the chief factors leading to softness in pork were the stage of maturity of the animals and the character of the feed—skim-milk in the ration possessing a correcting influence in the prevention of this undesirable quality.

The foregoing paragraphs present but a small portion of the work of the division. These examples, however, may serve to emphasize the value to Canadian agriculture of the chemical work of the Dominion Experimental Farms.

(By Annabelle Worthington)

**WHAT NEW YORK IS WEARING**  
Illustrated Dressmaking Lesson Furnished With Every Pattern

Today's little dress delights in its smart simplicity. It is cut along lovely slim lines and therefore suitable for many figures. And it has a pert bow added to its only contrasting vest. It's remarkable how such an addition can be so charming.

The diagonal seaming at the front of the skirt is decorative and slimming too. The skirt is circular with moderate fullness. A dark ground crepe silk print made the original.

Style No. 3219 may be had in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Sheer silk georgette crepe, plain flat crepe silk and wool and silk crepe novelties have stunning effects in this model. Size 16 requires 3½ yards 39-inch with ½ yard 30-inch contrasting. Pattern price 25 cents in stamps or coin (coin preferred). Wrap copy carefully.

Tarish on tin cooking vessels makes them more efficient by holding rather than reflecting heat.

The citrus growers of California have a \$25,000 insect laboratory.

### Should Be Two Years

One Year Record For Dairy Cow Not Fair Test Of Value

Too many dairymen are prone to judge a cow's value by a one-year record, instead of by her total production over a period of years, says K. S. Morrow, associate extension service dairyman of the New Jersey Agricultural Experiment Station. He says it requires approximately two years of milk production for a good cow to pay off the charge against her for rearing or purchase, after pointing out that it costs money to buy a cow or to rear one to a productive age.

"Whether or not a cow will be highly profitable depends on how many years she continues to return a good profit over the cost of her maintenance," Mr. Morrow emphasizes. "One ten-year-old cow will produce as much profit above all expenses as three cows that are kept in the herd until only 6 years old, assuming the average yearly production is the same for all animals."

"If the cows freshen at 2 years of age, the dairymen would have to milk three cows for four years to equal returns for one cow milked eight years. Care of three cows requires 50 per cent more labour. The investment in cows and feed is also 50 per cent more than is necessary for one high producer."

### Testing Cinder Deflector

Invention Of Montreal Man Being Tried Out By C.N.R.

Passengers in railway coaches should have no fear of hot cinders when they open windows of railway coaches if a new patented cinder deflector, being tried out on the London division of the Canadian National Railways, proves effective. The cinder deflector was invented by a Montreal man and was recently placed on engine No. 6148 on C.N.R. train No. 17, Montreal to Chicago. It attracted considerable attention. The deflector is a box-like device open at front and rear. It fits around the smokestack, catching the air and adding pressure to the smoke from the stack. The theory is that the force of the wind entering the device will be sufficient to lift all cinders high in the air with the smoke and keep them up until the train has passed under its own smoke cloud.

Making and selling toy balloons in the United States is a \$3,000,000 business.

Black and brown bears are still found over wide areas of this country from coast to coast.

### Excellent Wheat Quality

This Year's Western Wheat Crop Of High Protein Content

Additional tests of the milling and baking qualities of the 1931 crop have confirmed earlier conclusions that this year's crop is equal, if not superior, to that of any year examined. The tests were conducted by Dr. F. J. Birchard, chemist in charge of the research laboratory of the Board of Grain Commissioners.

The weights per bushel of the first four grades are all higher than last year. The average weight for No. 1 hard is 65½ pounds; for No. 1 northern, 65; No. 2 northern, 64½; No. 3 northern, 62½. With the increase in weight there is a corresponding increase in the percentage of flour in each grade. The average protein content is placed at 14.3 per cent. for the first four grades in Dr. Birchard's report.

"The baking quality of the first four grades is fully equal, if not superior to last year," says the report. "This is indicated by the very large volume and excellent texture of the loaves both when baked by themselves and when blended with typical soft wheats."

Attention is called to the relatively small percentage of wheat grading three northern or lower. Of the wheat passing through Winnipeg, 38.8 per cent. graded one northern, 34.1 per cent. two northern, 21.6 per cent. one hard, and only 4.5 per cent. three northern, and one percent. in other grades.

While the samples tested include wheat from the three prairie provinces, comparatively little from the northern sections of Saskatchewan and Alberta has been inspected. Heavy rains recently in those areas may affect the wheat.

### An Accurate Record

A native assistant in an Indian hospital thus recorded the state of health of one of his patients on the chart which hung over the bed:

11:00 a.m.—Patient in low degree.  
11:30 a.m.—Patient in the sink.  
12 Noon—Patient on the flit.  
12:15 p.m.—Patient flut.

### Many Diverse Applications

Divorce applications to the number of some 242 have been filed at Osgoode Hall, Toronto, so far this year. It was learned. Of this number 188 were applied for by wives and 109 by husbands. September was the high month for applications, 40 being recorded in that month.

More fires occur in winter than in summer, and there are more fires at night than in the day.

## Industry Must Take Leading Part In The Battle Against Depression, Says Dr. Manion

Calling upon industrial and business leaders together with men and women in every walk of life to pool their intellects in evolving a permanent cure for economic depression, Hon. R. J. Manion, Minister of Railways and Canals addressed at Windsor, the convention of the Boards of Trade and Chambers of Commerce of Ontario. Civilization was being challenged; it was on trial and "it is the duty of all good Canadians to give serious thought to the whole matter to avoid our civilization going the way of civilizations in the past."

Communism was not the cure, Dr. Manion hastened to add. Unemployment, hunger and hardship formed fertile ground for the seeds of Bolshevism. "Our whole system of production and distribution is out of gear. That is why paid agents of Moscow are in our midst today, feeding upon discontent like evil birds of prey. These agents must be suppressed, for while our civilization has its faults, we can gradually correct those conditions without crippling or destroying our whole political and economic structure."

Notwithstanding its nature, any plan or policy to combat economic conditions must be contributory, continued Dr. Manion. The employee, the employer and the state must contribute. Without elaborating on it, the federal minister said one per cent. of all the wages and salaries paid annually in Canada, would amount to \$25,000,000. "What good Canadian," he added, "would object to contributing one dollar of every hundred dollars he earns to protect himself and his fellow Canadian from the tragedy of unemployment? In some such manner, modified according to circumstances, an immense fund could be built up in the full years to protect us in the lean years."

Industry must take a leading part in the battle against depression, continued Dr. Manion. The Dominion, provincial and municipal governments were able to do only so much after that point other agencies must enter the lists. For one thing, industry must change its tempo of production. "With industry the system in the past has been to go full blast ahead in prosperous years or seasons, utilizing to the full its large factories, marvelous machines and the human element, but when depression arrives, the industries slow down and the workers have to be cared for by

the state until the next period of prosperity arrives." The Dominion this year was spending about \$50,000,000 in caring for the unemployed and this could not continue indefinitely.

"If our political and economic system is to endure," said Dr. Manion, "the ablest minds in industry, commerce and public life must try to evolve the alternating peaks of prosperity and depths of depression, and industry must give its assistance to the fullest. We must, in other words, stop inventing industrial machines which take employment from the hands of the workers and try to develop instead a social machine which will keep our people reasonably employed and so give us a contented and happy people. This is the best antidote to the poison of communism."

Dr. Manion closed his speech on a note of optimism. This country possessed immense natural resources, its banking system was strong and sound, the people were law-abiding, excellent ocean ports dotted the shoreline, unbounded commercial opportunities existed, particularly in the Orient and along the lines of preferential Empire trade. While this was not the time to "rock the boat" by capricious political criticism, likewise it was not the time to pay undue heed to "economic pessimists." There could be no doubt about Canada's future. "Its greatness is still to come."

### Lambs From E.P. Ranch Show Top Grade Form

Royal Ranch Has Done Much To Raise Standard Of Sheep Raising In Alberta

The Department of Agriculture at Ottawa has just received the formal report on the grading of 22 ram lambs under the Federal Ram Grading Policy. Of the lot 21 graded XXX or top grade. S. G. Freeborn, District Live Stock Promoter, who did the grading, states the lot were the best he has ever brought out. The E.P. Ranch has been giving special attention for a number of years to the improvement of his ranch flock, importing high grade rams from British flocks, and going farther afield to get rams with a view to improving fleece as well as body type. Sales of graded ram lambs and other rams from the flock have done much to raise the standard for the breed in Alberta, and also to increase the popularity and worth of sheep raising as an industry, particularly in the West.

### What Canada Spends Annually On Pupils

Sixty-Six Dollars Approximate Sum For Each One

Schools and colleges of Canada teach, roughly, one-quarter of the country's population and are attended by 2,400,000 pupils, according to a report issued by the Dominion Bureau of Statistics. Each pupil involves an annual expenditure of approximately \$66, the total cost being \$165,361,198. An instructional staff of 83,144 teachers supervises the educational requirements of "Canada junior."

Provincially-controlled schools of general education embrace 2,106,878 and the privately-controlled 92,275 (omitting from the calculation the enrolment of the Roman Catholic schools of Quebec).

### Has Ostrich Taste

When a three-year-old steer was slaughtered at Smithfield, London, England, recently, among the articles found in its stomach were seven pounds of rusty nails and screws, a silver brooch, part of a rubber Wellington boot, part of a bowler hat, a shoe buckle and several pieces of copper wire.

Of 300 theatres in China, 55 are equipped for sound films.

"What! You want leave for your silver wedding? I'll not, great it, or you will want leave every twenty-five years." — Fliegende Blätter, Munich.

### LEADERS OF CANADIAN BAR IN SESSION

From east and west Canada's leading barristers met at the 18th annual meeting of the Canadian Bar Association held during September at the Manoir Richelle, Murray Bay, Quebec. Officially opened by His Excellency the Governor-General, the sessions were also attended by distinguished leaders of the bar from England, France and the United States. Photographs show: top, view of the Manoir Terrace, during an informal gathering between business sessions; inset, Louis S. St. Laurent, K.C., Quebec, re-elected president of the Association, and E. H. Coleman, K.C., Winnipeg, re-elected secretary; bottom, a group of outstanding members and speakers photographed in front of the Manoir; left to right, Lord Dunsannon, son of the Governor-General; Hon. Alfred Durand, M.C., M.P., Minister of Marine; Hon. Maurice Dupre, K.C., M.P., Solicitor-General; Louis S. St. Laurent, K.C., L.L.D., Maître Fernan Payen, bâtonnier of Paris, France; His Excellency the Governor-General, Sir Alexander Lawrence, Bart., Charles A. Boston, president of the American Bar Association, Sir Lyndet Macnaghey, K.B.E., K.C. London, England; Hon. N. W. Rowell, P.C., K.C., L.L.D., Toronto, and Mr. Justice Chisholm, Halifax.—Photographs by Can. Steamship Lines.

"I never knew my father and mother."  
"Does that worry you?"  
"Yes. Magistrates will never believe that I have inherited my misfortunes." — Der Brummer, Berlin.

## LOST 20 LBS. FAT

### Without Altering Diet

To reduce weight without any attention to diet is rather more than anyone should expect. That the Kruschen method should have succeeded in this case, is a great tribute to its effectiveness.

"When I started taking Kruschen for reducing weight, I weighed 170 lbs. That was seven months ago. I decided I was too heavy, and now, thanks to the half teaspoonful of Kruschen every morning, I tip the scale at 150 lbs. I have been that weight for nearly four months. I may say I feel much better. I did not diet myself in any way whatever."—E.C.

Kruschen Salts do not reduce you overnight—like so many products claim to do. But taken regularly over a period of time—with a modified diet and gentle exercise, half a teaspoonful in a glass of hot water every morning before breakfast will take away unhealthy flesh and restore your figure to its normal weight. Yet at the same time—build up health with a great increase in vigor and energy for you!

## WORLD HAPPENINGS BRIEFLY TOLD

Calgary's nine months' revenue report shows collections \$140,000 above the same period last year.

More than \$9,000,000 is to be spent on harbor development at Canton, China.

About 242 divorce applications have been filed at Osgoode Hall, of which 133 were filed by wives.

An increase in the value of meat and meat products exported from Canada for September is shown by the Dominion Bureau of Statistics.

Some 400 persons have been given employment in New York selling telephone service and extensions on commission.

Not a drop of rain has fallen in the Lorca district, near Murcia, Spain, for over seven years, and the peasants are imploring the Government's help.

Estimates that the Australian wheat crop will be 20 per cent. smaller than last year have been received at the agriculture department, Washington.

Increased activity is reported in many Lancashire and Yorkshire cotton mills as a result of an influx of orders since the gold standard was suspended.

The New York American, quoting "an informed source," says the late Senator Dwight W. Morrow, of New Jersey, left an estate of "close to \$20,000,000."

According to the official census taken in June, Ottawa has a population of 124,988, or an increase of 15.90 per cent. in ten years. The 1921 census gave Ottawa a population of 107,843.

A special cable from London to the New York Times announces the death in Bournemouth, England, of General Sir Reginald Hart, 83. Sir Reginald was the oldest holder of the Victoria Cross, which was awarded him in the Afghan war of 1879.

## Separate Grade For Garnet Wheat Asked

May Be Excluded From Contract Grades Of Northern Classes

Garnet wheat will be excluded from the contract grades of the northern classes after July 31, 1932, if a resolution passed unanimously by the Western Grain Standards Board is approved and the Canadian Grain Act duly amended at the next session of parliament.

The resolution urged that it be graded as a separate variety of wheat in grades to be known as number one, two and three Garnet, with anything which fails to meet the requirements of these grades being included in the lower grades of the red spring wheat.

Aviators flying at night through the high-walled gorge of the Columbia River, are now guided for 50 miles by red and green beacon lights.

"My mother is kind, she promised me a doll yesterday and gave it to me today."

"That is nothing—my mother promised me a little brother and today she gave me three."—Il Travaso, Rome.

W. N. U. 1913

## Worry and Fear

Factors That Help To Shorten the Span Of Life

The way that hate, fear, worry and jealousy have helped to choke off at 58 years man's hitherto rapidly increasing span of life, was described to the American College of Surgeons in New York.

The bank president worrying over business, the criminal suddenly stricken with fear and the mother watching her sick child all were pictured as doing the same injury to their health.

This increase to 58 as the average time every adult may expect to live was discussed by two internationally known physicians, Dr. George W. Crile of the Cleveland Clinic, and Dr. Charles H. Mayo, of the Mayo Clinic of Rochester, Minn.

Dr. Crile told the medical story of ravages of emotions of modern civilization. Dr. Mayo sketched remedies for ill health, which included newspapers as "the greatest educating, thought-moulding enterprise in the world."

By Annette

CROSS-OVER LINES TEND TO MAKE THE FIGURE APPEAR SLIM

You'll love this silk crepe shantung in powder blue and white.

It's so extremely serviceable. Its moulded lines with wrapped arrangement through the bodice makes it especially desirable for the woman inclined to overweight. The surplice shawl collar of plain white crepe does its bit toward minimizing breadth.

It's simplicity itself to copy it! The bodice cuts in one until it joins the skirt.

It's a splendid opportunity! Choose now! You'll be delighted with this smart model.

Style No. 931 may be had in sizes 16, 18, 20 years, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards of 39-inch material with 3/4 yard of 35-inch contrasting.

Charming for this model for town or resort are the pastel flat crepe silks, Chinese silk damask, linen and shirting fabrics.

Pattern price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

## Men, Not Gold

Arthur Brisbane, a United States editorial writer, comments on the flying performances of the British Lieutenant Stainforth who made a mark of 386 miles per hour, and says: "A nation that can make such airplanes and find men to run them ought not to be discouraged about a few million pounds sterling one way or the other. It is what men have in their brains that makes a country."

## BRITISH "BOBBIE" STRIVES FOR LAW AND ORDER

This lively scrimmage is far more reminiscent of what is expected of Red Russia than of usually staid, peaceful London, but such scenes as this battle between a London policeman and several marchers in an unemployment parade, have become frequent in the British capital as demonstrations increase over prevailing economic conditions. The policeman was trying to tear a red banner from the hands of the struggling marchers as this picture was snapped in exclusive Oxford Street, London, England.

## China Becoming Modern

Western Mode Of Living Is Being Gradually Adopted

That China is rapidly narrowing the gap of centuries between its antiquated mode of living and modern civilization has been evidenced in many ways. The Chinese student is avid for Occidental knowledge and may often be seen mingling with enthusiastic graduates at Columbia and other universities. The Oriental nation has realized the healthful benefits of wheat at a most opportune time and is now becoming a net consumptive market for 15,000,000 bushels of surplus wheat from the Federal Farm Board's stocks, which it recently purchased on a long-term credit basis. Nor is the health of the modern Chinese baby being neglected. The best milk and butter that registered Ayrshire cows can produce will attend to this necessity for the Hong Kong Dairy and Cold Storage Company has placed an order with the British Columbia Ayrshire Breeders' Association for 50 head.

## The New Honey Grades

Canadian Standard For Honey Provide A Natural Classification

The consuming public are showing a special interest in the attractive appearance and convenient identification of quality which is made possible by the new honey grades, which come into effect this year. Where honey is sold by grade the grading must conform to the Canadian standards. The Canadian standards for honey provide a natural classification by colour into the four classes "White," "Golden," "Amber," and "Dark." These classes in turn are graded strictly on the quality basis as "Fancy," "Choice" or "Manufacturers." The honey grades are especially popular because of the consistency of the application of grade terminology to the product when graded, the inherent quality of the honey literally speaks for itself.

## Must Buy At Home

The woman of Turkey's officialdom must turn their eyes from the mode of Paris and buy their gowns at home, the cabinet has decided. The edict against foreign raiment applies even to President Mustafa Kemal, who must forego his London tailor's services. It's all part of a national economy programme.

Wife (to husband who has fired at rabbit just as chimney is belted): "Oh, John, dear, look what you've done now!"—The London Opinion.

## SUNDAY SCHOOL LESSON

### NOVEMBER 1

WORLD'S TEMPERANCE SUNDAY

Golden Text: "Be not drunken with wine, wherein is riot, but be filled with the Spirit."—Ephesians 5:18. Lesson: Galatians 5:13-26; Romans 13:1-7. Devotional Reading: Romans 14:13-21.

## Explanations and Comments

"Brothers," wrote Paul to the Galatians, "Christian liberty does not mean that you are free from the Law, but Christian liberty does not mean that you can do as you please."

"A Christian man is the most free lord of all, and subject to none; a Christian man is the most dutiful servant of all, and subject to all."

Liberty and license are not synonymous. Do not use your freedom as a license for indulging your lower impulses, but live in accordance with the law of love. "Flesh" is used here for "that element of man's nature which is opposed to goodness and makes for evil. It signifies the entire potency of sin."

"Through loving services for others," continued Paul, "you fulfill the whole divine law, which is, Thou shalt love thy neighbour as thyself."

Paul here quotes Leviticus 19:18. Then remembering that the Galatians were prone to quarrel, Paul adds, "But if ye hate and devour one another—act toward one another like beasts or wild beasts—be aware lest you destroy one another." "Mutual backbiting and hatred can only end in the destruction of one another's spiritual life."

The Power Of The Spirit, verses 16-18.—Walk by the Spirit, submit to the guidance of the Holy Spirit in all your actions, and then you will fulfil the desire of your evil nature. For the evil nature and the indwelling Holy Spirit are antagonistic. "Throughout this passage the 'Spirit' is evidently the Divine Spirit, for the human spirit in itself and unaided does not stand in direct antagonism to the flesh."

Lightfoot. "If you are led by the Spirit," Paul continues, "you are not under the law, for you will not disobey it." "Law exists for the purpose of restraint, but in the works of the Spirit there is nothing to restrain."

The Works Of The Spirit, verses 19-21.—The works of the flesh are manifest—plainly seen—Paul declares, and lists a repelling list of some fifteen vices which were common among the Galatians. "It may be shown as a proof of depravity that vocabularies have more words descriptive of forms of sin than words descriptive of forms of holiness. Under the fruit of the Spirit Paul gives a list of nine, but under the works of the flesh his list extends to fifteen, properly sixteen, and the word translated 'which' implies that he did not profess to give an exhaustive list—he could easily have added other instances."—R. Finlayson.

The Fruit Of The Spirit, verses 22-24.—When the baleful effects of the self-life is corrected, the fruits of the Spirit appear naturally and easily. Note the distinction between work, in which there is effort, and fruit, which flows so imperceptibly and silently on the branch, pressed out from within.

Who is governed by the inner spirit is not content merely to refrain from breaking the law; he exercises positive virtues as Paul now enumerates: love, joy, peace, long-suffering, kindness, goodness, faithfulness, meekness, self-control. Each of these is the result of the first which is love. Against such there is no law. "Paul is content to remark—not without a touch of irony in his tone—that these things do not seem to call for the interference of legislation!"—A. W. Robinson.

The Final Counsel, verses 25, 26.—"If we live by the Spirit, by the Spirit let us also walk." Walking by the Spirit is the effect of living by the Spirit. If the Divine Spirit has control of our spirit, then we are living joyfully, doing daily what we believe Christ would have us do.

## ...NIGHT COUGHS

Quickly Checked and a Restful Night Assured

## Growth Of Swedish Town

Modern City Was Arctic Wilderness Twenty Years Ago

A little more than twenty years ago the thriving town of Kiruna, Sweden, was nothing more than Arctic wilderness, the abode of wandering Lapps and herds of reindeer. Today it is a bustling community of 11,000 inhabitants which serves as the commercial center of a vast iron industry with a history as romantic as the most adventurous pioneering exploits of North America. Swedish engineering skill has placed in the center of polar wastes a small modern city with as many up-to-date mechanical comforts as the most fastidious American city dweller could wish for. In the industrial world, Kiruna has become known for its almost unlimited iron ore resources. Figures given by officials of the mining syndicate which controls the properties show that more than 9,000,000 tons of iron ore were produced during 1930. A steady annual gain has been recorded since the mines were first worked on a large scale, about 1911.

## Ex-Kaiser Leads Active Life

Occupies Time Taking Several Forms Of Physical Exercise

Ex-Kaiser Wilhelm is not the old, worn-out man that many people think him to be. Quite on the contrary, he leads a very active life, according to the Doorn correspondent of the Berlin Tempo. His household consists of some sixty persons, and he continually receives visits from members of the former royal family. The ex-kaiser relies to a large extent on physical exercise to occupy his time. He arises at 6 a.m. and often takes a brisk walk before morning chapel at 8. Breakfast is at 9. During the remaining of the morning he either plays tennis, indulges in wood chopping or again strolls through the woods adjoining his palace. He is accompanied on his walks by his pack of dogs—three dachshunds, a Russian wolfhound and a German shepherd dog. He has so completely cleaned out his own park of fallen and dead wood that he is forced to rely on his neighbors to "give" him work to do.

Lawyer: "It would be better if you could produce an alibi. Did anybody see you at the time of the crime?" Client: "Fortunately, no."

## Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exciting uses get "Centre Pull" Packs in sheet form.

## THE HOUSE OF DREAMS-COME-TRUE

— BY —  
MARGARET FIEDLER

"The Splendid Folly," "The Hermit of Far End,"  
Hodder & Stoughton, Ltd., London.

### CHAPTER IV.—Continued.

Jean, always sensitive to her surroundings, shivered a little.

"It's rather eerie, isn't it?" she said. "It's just as if someone had suddenly turned the lights out."

"Quite a nice bit of symbolism," he returned enigmatically.

"How? I don't think I understand."

"He laughed a little."

"How should you? You're young. Fate doesn't come along and snuff out the lights for you when you are what shall we say? Eighteen?"

"You're two years out," replied Jean composedly.

"As much? Then let's hope you'll have so much the longer to wait before Madame Destiny comes round with her snafus."

He spoke with a kind of bitter humour, the backwash surely, of some storm through which he must have passed. Jean looked across at him with a vague trouble in her face.

"Then, do you think," she spoke uncertainly—"do you believe it is inevitable that she will come—sooner or later?"

"I hope not," he said gently. "But she comes to most of us."

She longed to put another question, but there was a note of finality in his voice—a kind of "thus far shall thou come and no further"—that warned her to probe no deeper. Whatever it was of bitterness that lay in the Englishman's past, he had no intention of sharing the knowledge with his chance companion of a day. He seemed to have become absorbed once more in his own thoughts, and for a time they tramped along together in silence.

The ascent steepened perceptibly, and Jean, light and active as she was, found it hard work to keep pace with the man's steady, swinging stride. Apparently his thoughts engrossed him to the exclusion of everything else, for he appeared to have utterly forgotten her existence. It was only when a slip of her foot on the beaten surface of the snow wrung a quick exclamation from her that he paused, wheeling round in consternation.

"I beg your pardon! I'm walking off your legs! Why on earth didn't you stop me?"

There was something irresistibly boyish about the quick apology. Jean laughed, a little breathless from the swift climb uphill.

"You seemed so bent on getting to the top in the least possible time," she replied demurely, "that I didn't like to disappoint you."

"I'm afraid I make a poor sort of guide," he admitted. "I was thinking of something else. You must forgive me."

They resumed their climb more leisurely. The trees were thinning a bit now, and ahead, between the tall, straight trunks winged with drooping, snow-laden branches, they could catch glimpses of the white world beyond.

Presently they came out above the pine-wood to the edge of a broad plateau and Jean uttered an exclamation of delight, gazing spell-bound at the scene thus suddenly unfolded.

Behind them, in the pine-clad valley, a frozen reach of water gleamed like a dull sheet of metal, whilst before them, far above, stretched the great chain of mountains, pinnacle after pinnacle, capped with snow,

thrusting up into the cloud-swept sky. Through rifts in the cloud—almost, it seemed, torn in the breast of heaven by those towering peaks—the sunlight shined in long shafts, cheerfully the snow with shimmering patches of pale gold.

"It was worth the climb, then?" "The Englishman, his gaze on Jean's rapt face, broke the silence abruptly. She turned to him, radiant-eyed.

"It's so beautiful that it makes one's heart ache!" she exclaimed, laying her hand on her breast with the sole foreign turn of gesture she derived from her French ancestry. She said no more, but remained very still, drinking in the sheer loveliness of the scene.

The man regarded her quietly as she stood there silhouetted against the skyline, her slim, brown-clad figure striking a warm note amid the chill Alpine whites and greys. Her face was slightly tilted, and as the sunshine glinted on her hair and eyes, waking the russet lights that shimmered in them, there was something vividly arresting about her—a splendour of ardent youth which brought a somewhat wistful expression into the rather weary eyes of the man watching her.

His thought travelled back to the brief snatch of conversation evoked by the sudden gloom of the pine-woods. Surely, for once, Fate would lay aside her snuffers and let this young, eager life pass by unshadowed!

Even as the thought took shape in his mind, Jean turned to him again, her face still radiant.

"Thank you for bringing me up here," she said simply. "It has been perfect."

She stretched out her hand, and he took it and held it in his for a moment.

"I'm glad you've liked it," he answered quietly. "It will always be a part of our day together—the day we stole from the conveniences—like this young, eager life pass by unshadowed!"

"Most maternal person!" She laughed out at him. "I suppose you think a ham sandwich worth all the scenery in the world?"

"I'll admit to a preference for the sandwich at the moment," he acknowledged. "Come, now, confess! Aren't you hungry, too?"

"Starving! This air makes me feel as if I'd never had anything to eat in my life before!"

"Well, then, come and inspect my salte a manger."

The proposed refuge proved to be a roughly constructed little hut—hardly more than a shed provided with a door and thick-paneled window, its only furniture a wooden bench and table. But that it had served its purpose as a kind of "travellers' rest" was proved by the fragments of appreciation, both in prose and verse, that were to be found inscribed in a species of "Visitors' Book" which lay on the table, carefully preserved from damp by a strong metal box. Jean amused herself by perusing the various contributions to its pages while the Englishman unpacked the contents of his knapsack.

The lunch that followed was a merry little meal, the two conversing with a happy intimacy and freedom from reserve based on the reassuring knowledge that they would, in all probability, never meet again. Afterwards, they bent their energies to concerting a suitable inscription for insertion in the "Visitors' Book," squabbling like a couple of children over the particular form it should take.

So absorbed were they in the discussion that they failed to notice the perceptible cooling of the temperature. The sun no longer warmed the roofing of the hut, and there was a desolate note in the sudden gust of wind which shook the door at frequent intervals as though trying to attract the attention of those within. Presently, a louder rattle than usual, coincident with a chance pause in the conversation, roused them eventually.

The Englishman's keen glance flashed to the little window, through which was visible a dancing, whirling blur of white.

"Great Scott!" he exclaimed in good round English. "It's snowing like the very dickens!"

In two strides he had reached the door, and, throwing it open, peered out. A draught of icy air rushed into

## CHILD need REGULATING?

CASTORIA WILL

DO IT!

When your child needs regulating, remember this: the organs of babies and children are delicate. Little bowels must be gently urged—never forced. That's why Castoria is used by so many doctors and mothers. It is specially made for children's ailments, contains no harsh, harmful drugs, no narcotics. You can safely give it to young infants for colic, pain, or a constipated bowels. It is an equally effective regulator for older children. The next time your child has a little cold or fever, or a constipated bowels, give him the help of Castoria, the children's own remedy. Genuine Castoria always has the name:

*Wm. L. Potter*  
**CASTORIA**  
CHILDREN CRY FOR IT

the hut, accompanied by a flurry of fine snow driven on the wind.

When he turned back, his face had assumed a sudden look of gravity.

"We must go at once," he said, speaking in French again and apparently unconscious of his momentary lapse into his native tongue. "If we don't we shall be able to get back at all."

The snow drifts quickly in the valley. Half an hour more of this and we shouldn't be able to get through."

Jean thrust the Visitors' Book back into its box, and began hastily repacking her companion's knapsack, but he stopped her almost roughly.

"Never mind that. Fasten that fur thing closer round your throat and come on. There's no taking chances in a blizzard like this. Don't you understand?"—almost roughly. "If we waste time we may have to spend the night here."

Impelled by the sudden urgency of his tones, Jean followed him swiftly out of the hut, and the wind, as though balked by her haste, snatched the door from her grasp and drove it to with a menacing thud behind them.

(To Be Continued.)

## Honor Canadian Doctors

Westerners Appointed To Governing Body Of American College Of Surgeons

Dr. W. Edward Galle, professor of surgery at the University of Toronto, was elected a vice-president of the American College of Surgeons, meet in New York. He will be installed at the next annual meeting.

Installed as vice-president was Dr. Ross Millar, director of medical sciences of the Department of Penitents and National Health, Ottawa.

Dr. J. Bentley Squier, of New York, was elected president and will take office at the 1932 annual congress.

Among those elected to the Board of Regents was Dr. Robert E. McKelvie, of Vancouver, B.C.

A group of more than fifty prominent surgeons of North and South America will take office at once on the Board of Governors. They include Dr. Ambrose L. Lockwood, of Toronto; Dr. Hugh MacLean, of Regina, Sask.; Dr. Alexander Monroe, of Calgary, Alberta, and Dr. William Harvey Smith, of Winnipeg.

The congress has a system of election whereby at the same congress at which the incoming officers are inaugurated, officers for the following term are elected.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying the reliable remedy—Mother Graves' Worm Extirminator.

## Simple When You Know

Last month's says the New Yorker, a gentleman got his bill from Hamacher, Schlemmer's. He hadn't bought much there the previous month; only one item was listed, but that one item puzzled him exceedingly. It was "I gr F H Br Ir Wd Scs —0.45." He puzzled over this for some time, and got nowhere; finally for the sake of his peace of mind, he called the store and asked them please to explain what it meant. Simple matter. It meant: "One gross flat-headed bright iron wood screws."

English is displacing French as the first foreign language taught in many Prussian schools.

Gasoline is being sold in Germany at 40 cents a gallon.

## Duck Carries Band For Nine Years

Valuable Information Regarding Habits Of Birds Obtained Through Banding Method

On the first day of the 1930 open season for black duck in the province of New Brunswick, a resident of Jolicoeur brought down a banded black duck which had been winging its way over marsh and river for more than nine years. Proof of this is the fact that the bird was wearing Band No. 5180, which is one of the official bands used by the National Parks of Canada Branch, Department of the Interior, Ottawa, and the United States Bureau of Biological Survey at Washington, D.C., which co-operate in conducting bird banding as a means of collecting scientific data concerning wild birds. Band No. 5180 was placed on this black duck by H. S. Osler, K.C., at Lake Scugog, Ontario, on September 15, 1921. Could it be related the story of the duck's adventures and how it managed to escape all hazards for over nine years would be an interesting one. Much valuable information concerning the migration, range, and longevity of many species of wild birds is being obtained by the banding method. Any person who finds a banded bird is requested to help with this important work by reporting the details to the Commissioner, National Parks of Canada, Department of the Interior, Ottawa.

## Experience Is Limited

United States Has Not Learned Secret Of Lending

Before the war, England conducted the great bulk of the world's trade with a trifling gold stock, and she took care to prevent an accumulation of it by free lending abroad. But though the United States has £1,000,000,000 of gold she is doing nothing with it, and unconsciously is thereby helping to accentuate and prolong the depression in world trade, from which she is now suffering as acutely as any other country. America has had only a limited experience as a creditor country, and it may appear to her that she cannot advantageously lend to bad debtors. Debtors more urgently need assistance when they are bad than when they are good. Bad though their position may be it will become worse unless they are helped. Debtor countries are by no means blameless, but the responsibilities of creditors are not less grave than those of debtor countries.—Financial Page, London Times, England.

Persistent Asthma. A most distressing characteristic of this debilitating disease, is the persistence with which recurring attacks come to sap away strength and leave the sufferer a state of almost constant exhaustion. No wiser precaution can be taken than that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from the tender air passages.

Held Record As Bricklayer

Nine million bricks have been made by Mary Foxall of Lye, Worcestershire, England, in the sixteen years she has been at the occupation. She held the county's record, which she achieved by maintaining an average of six hundred and fifty bricks a day.

At all events, Gar Wood and Kaye Don broken even in regard to the brevity of their names.

When PAIN Comes

WHAT many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes the acids instantly. And the best at known to medical science is Phillips' Milk of Magnesia.

One spoonful of this harmless, tasteless alkali in water neutralizes instantly many times that much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia, prescribed by physicians for 50 years in correcting excess acids. 50c a bottle—any drug store. (Made in Canada.)

## Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

## A Birthday Party

Birthday Cards To Be Sent From Royal Winter Fair

Every boy and girl in Canada whose tenth birthday falls between November 18 and 28, inclusive, will receive a personal birthday card from the Royal Winter Fair, Toronto, if it is requested. This is because the winter fair on those dates also celebrates its tenth "birthday."

This year the fair is designated a "commemorative show" to recall the inspiring influence it was to Canadian agriculture when founded ten years ago. And it is to help in spreading a cheery outlook respecting agriculture that the birthday party is being held.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

## THE RHYMING OPTIMIST

By ALICE MICHAELS

### LIFE'S DELIGHT

Sometimes love is a rose glow  
In a garden gay with sun,  
Where the winds all sweet with perfume  
And song is never done.

As day by day the roses nod  
And brighten the garden-place,  
So love in a life is the smile of God,  
And life grows fair by love's grace.

Sometimes love is a lily-bud  
As lovely as the moon,  
A lily-bud in the star-light's flood  
On the still and black lagoons.

As lilies may lift their petals pale  
Out of the mud and slime,  
So love in a life can never fail  
To make that life sublime.

Love may be rose or lily white,  
A thing of sun or shade;  
But always love has been life's delight,  
Since ever the world was made.

## Was Always a Nobleman

Receiving Title Did Not Change Sir Thomas Lipton

Samuel Smiles never had a clearer self-made man than Thomas Lipton. The boy to whom a guinea used to be a fortune became the master of millions and the employer of hosts of men. He was generous with his money, never more so than in the World War, when he turned the Erin into a hospital ship; and Serbia knew him as "Uncle Tom." His motto was "Labor Omnia Vincit." A friend of the early Glasgow days said of him: "He did not need to be knighted to be a nobleman."

## Get Acquainted First

Wife:—The couple next door seem to be very devoted, John. He kisses her every time he goes out and when he comes in again, and waves kisses to her from down the street. Why don't you do that?

Hubby:—Hang it all, give a man time, I don't even know her yet.

## Russia's Policemen

Moscow, Russia, is one of the few cities of the world to boast of uniformed policemen on regular beats. They wear helmets, and, attached to a belt over their olive-drab jackets, is a pistol in a leather holster.

Canada has 12,427 post offices, an increase of 18 since last year and of 180 since 1922. Rural mail carriers throughout the country number 4,256.

## Little Helps For This Week

"Blessed is that man that maketh the Lord his trust."—Psalm xl, 4.

Just to trust and yet to ask Guidance still,

Take the training or the task As he will.

Just to take the loss or gain As he sends it;

Just to take the joy or pain As He lends it.

This is all and yet the way Marked by Him who loves thee

Secret of a happy day, Secret of His promised rest.

—Frances Ridley Havergal.

If you go to Him to be guided, He will guide you; but He will not comfort your distrust or half-trust of Him by showing you the chart of all His purposes concerning you. He will only show you into a way where, if you go cheerfully and trustfully, He will show you on still farther. No contract will be made with you save that He engages, if you trust Him, to lead you into the best things all the way through.—Horace Bushnell.

## Species Is Unknown

Petrified Fish Found In Gravel Pit Near Moose Jaw

Mute testimony of the belief that the prairies were once covered by many fathoms of water is borne in the finding of a petrified fish of an unknown species, in a gravel pit, three miles southeast of Moose Jaw.

Carl Erickson, working at the rock pile was smashing a huge rock of 500 or 600 pounds when he came upon the "fish." It was right in the centre of the huge rock which had been dug up from a depth of about eight feet underground.

This relic of a distant age resembles the small and is about the size of a man's hat.

The agent drives it 400 miles while demonstrating, and it's still a new car. Then you drive it home and it's a used car, worth \$800 less.

## Keep on your Feet

4 MORE ACTIVE DAYS

## Every Month She's "Sick Again"

Too bad! Sick again... doubled up with cramps. The boss was nice... awfully patient.

But it was so embarrassing... everybody in the office knew that she "wasn't well."

Then a girl friend told her what to do. You need Lydia E. Pinkham's Vegetable Compound. It's a wonderful medicine to use during those times.

It keeps you up. Drives away those blues. Keeps you on your feet. Won't you try a box of the new tablets?

Lydia E. Pinkham's  
VEGETABLE COMPOUND

## Could Not Check the Summer Complaint

A Few Doses Did It

Mrs. R. Coulter, 918-111 Ave. E., Calgary, Alta., writes: "I had summer my young son was bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the discharges checked, so I went to the drug store and gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. It did give the boy the first discharge. I noticed the discharges were being checked, and it was not long before he was well again."

## The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

## Heard Around Town

H. D. Connor was a Calgary visitor last week.

J. H. Cooley was a Calgary business visitor last week.

Mrs. F. Otto and Madeline were Cereal visitors Monday.

Putting on storm windows and doors is one of the chief occupations of our citizens these days.

Mr. and Mrs. Harry Lloyd spent Sunday at Alask and, on their return, visited at the home of Mr. and Mrs. K. L. Parks, of Sibbald.

Mrs. M. C. Nicholson, who attended the Press Convention which was held at the Palliser hotel, Calgary, returned home Thursday morning.

P. Demare, who has been at Gratum for the past three weeks looking after his farm interests there, returned to his home on Wednesday.

Mr. and Mrs. I. B. Honger and little son, also Mr. and Mrs. C. Stevenson, all of Conroy, Alberta, are visiting at the home of their brother, Oscar Nelson.

The Masons, when they hold their next meeting, will convene in their new home in the hall which has been remodelled for them by Mr. Rideout in the building, formerly occupied by the Royal Bank.

The weather on Monday gave every indication that winter was about to set in—high winds with snow flurries—but Tuesday morning the sun came out in all its glory and we are enjoying real Indian summer weather again.

Geo. E. Aitken, partner of the Acadia Produce Co., with his nephew, Jas. Aitken, who has been looking after their farm interests here during the summer months, left Thursday by motor for their home at Vancouver, B.C.

If you place your order now for Personal Greeting Cards we shall be glad to present you with a cabinet of fine quality Note Paper and Envelopes with your initials engraved thereon for orders of 25 or more cards of one design. This offer is for a limited period only and we suggest placing your order now. Sample cards may be seen at the office of the Chinook Advance. Remember your friends this Christmas season.

## Surprise Farewell Party

A surprise party consisting of over sixty neighbors and friends of Mr. and Mrs. W. H. Wright met at their home on Friday evening, Oct. 23rd. A very pleasant evening was spent. The young people enjoyed themselves dancing, while the others played cards and had a sociable visit. A number of speeches were made when each one regretted very much to lose a family who are so highly respected and who meant so much to the Chinook district.

We understand that Mr. Wright and family intend leaving this district for Stettler some time in November.

C. E. Neff, of Hanna, was a Chinook business visitor Thursday.

Mr. J. G. Connell paid Cereal a business visit to day.

Richard Peyton visited with his two daughters at Calgary last week.

Mr. J. W. McLennan, of Heathdale, was a business visitor in town Wednesday.

The main thing for organizations to do is agree on something then stand by it.

Mr. and Mrs. K. L. Parks, of Sibbald, are leaving shortly for Sylvan Lake where they will in future reside.

Richard Maywhere moved from the Collholme district and will in future reside at Athabasca. He left Tuesday.

Next Saturday evening is Halloween. Be sure you have your supply of apples, candies, etc., ready for the kiddies.

Quite a number of the farmers are busy at the present time hauling their winter's supply of coal from the Sherrin coal mine.

Maybe you don't need to advertise because everybody knows you are here; but everybody doesn't know what you have nor your prices.

Mr. Feare, of Edmonton, district superintendent of the unorganized municipal districts, who has been here for the past month, left for his home at Coronation on Monday.

The regular meeting of the Chinook W.I. will be held Wednesday, Nov. 4, at the home of Mrs. M. L. Chapman. Mrs. Dawson and Mrs. Chapman being hostesses. After the regular business, the committee on "Immigration and Legislation" will take charge. Mr. Lorne Proudfoot, M.L.A., will be present and will deliver an address. A full attendance is requested. Meeting opens at 2:30 sharp.

A Sunday school convention in connection with the Cereal-Chinook United church district was to have been held Wednesday afternoon, however, as there were only three delegates who came, namely, Mrs. Coupland of Richdale, Mrs. Lowney and Mr. Francis Hughes of Cereal, the afternoon meeting was not held. Mr. and Mrs. Isbister entertained the delegates also Rev. Woodlall. In the evening Rev. Mr. Woodlall put on lantern slides which showed some very fine pictures, the best we have ever seen. Mrs. Coupland gave a good paper on "A One Room Sunday School," and Mr. Hughes gave a very beneficial address on Sunday school work.

## Peyton Pickings

The people in the Peyton district regret very much to part with their friend and neighbor, Mr. Richard Maywhere, who left Tuesday morning to a farm near Collington, Alberta. Mr. Maywhere was one of the early settlers in this district, a willing worker and an obliging neighbor in all respects. What is our loss is another's gain.

Mr. and Mrs. H. Dunster and family, Miss Margaret Bayley and Mr. Phiffer were dinner guests on Sunday at the home of Mr. and Mrs. Warren.

A large gathering attended the Anglican church service at Peyton school last Sunday evening.

Mr. and Mrs. N. Stewart were callers at the Hutchison home on Sunday evening.

Miss A. Neff, of Heathdale, and Miss M. Marshall visited Mrs. Turple on Saturday.

## Collholme Collections

Mr. and Mrs. J. Duncan, also Mr. and Mrs. J. Couits, who spent a few days in Calgary last week, returned home last weekend.

Ewart Duncan and W. Morrison recently constructed a windmill battery charger at the former's home.

Mr. A. Spreeman, while returning from the coal mine last week, had the misfortune to have the wheel of his truck come off while running. Some damage was done.

C. R. Wilson is moving his belongings to town this week. He is loading his cars on Saturday and will leave Monday morning for the north country.

Miss Pearl Stevenson, who has been ill for the past week or so, is now able to be up and around again.

R. Maywhere has moved his machinery, horses, etc., to town. He is leaving on Monday for the north country. Dick figured on getting a Swedish housekeeper and now Louise Robinson is thinking of applying for the position.

Brown & Wilson completed this year's threshing operations last Thursday, Oct. 22.

## Rearville Items

Clarence Higdon arrived last week to spend the winter on the farm with Mr. Catton.

Mr. and Mrs. Gillette left Saturday morning for Innisfail after receiving word Friday evening that their only daughter, Alta, was ill in the Innisfail hospital.

A. Hodge, of the Rearville district, passed through Heathdale on Monday with his outfit and household effects on his way to town to ship out to his new home in the Cold Lake district.

Mr. and Mrs. W. Anderson, and daughter, Evelyn, spent the

## A Smile and a Laugh

Justice—How did the accident happen?

Student—I was just hugging a curve.

Justice—Yes, that's the way most of them happen.

Minister—I hear they've gone dry in the village where your brother lives, Paddy?

Paddy—Dr? They're parched. I've just had a letter from Mike, and the postage stamp was stuck on with a pin!

Father—Young lady, do you mean to tell me you've been carrying that money around in your stocking?

Daughter—Why, daddy, you told me to put it where it would draw interest.

The man next doors went on a fishing trip. He caught a big bass, the largest he had ever landed in his life. Elated over his triumph, he telegraphed his wife: "I've got one, weighs seven pounds; is a beauty."

Back came the answer by return wire: "So have I; weighs ten pounds; is a beauty—looks like you; come home."

It was not much of a bus and the driver, being dissatisfied, took it back to the garage.

"What is wrong with it?" he was asked.

"Well, you see," said the driver, "every part of it makes a noise except the horn."

It was on a road in Ireland. The driver of the motor van was giving a lift to a tramp on whom he had taken pity. With the driver was a promising striping of four years.

"This is a fine lad ye have here," said the tramp admiringly. "A magnificent head and noble features. Could you lend me a couple of pounds?"

"Sure, Oi could not," replied the driver, emphatically. "Is me wife's child by her first husband."

In these days of the high cost of living the following story has a decided point.

The teacher of a primary class: "What do you think is the most wonderful thing man ever made?" A little girl, whose parents were obviously harassed by the question of ways and means, replied as solemnly as the proverbial judge: "A living for a family."

The trouble with the most of us is that our necessities are too numerous and our luxuries too necessary.

week-end in Calgary.

Mrs. Pat Munro is the guest of Mrs. J. Poerkins.

Art Jackson left last week for the north country.

Last week was a busy week at the Anderson mine at Sherrin. Quite a number of farmers were trailing from this district and were caught in the sand storm.

Saturday is Hanna convention day and Collholme U.F.A. Local is prepared to send its full quota of delegates.

## Hotel Changes Hands

The sale of the Acadia hotel, Chinook, to Capt. C. O. Peters, of Miami, Florida, U.S.A., and formerly of Toronto, Ont., took place on Wednesday, Oct. 28.

Capt. Peters has leased the hotel back to the former owner, Mr. J. G. Connell until the end of this year. Capt. Peters will take possession on New Year's day and will open up with a banquet to the business men and a Christmas tree for the children ending up with a dance, in order to start the New Year right with the largest hotel on the main road between Calgary and Saskatoon.

## Grain Loadings Show Increase

A decided increase in the amount of grain marketed and loaded at rural points on the C.N.R. has been noticeable during the past two weeks, and over a million bushels have been marketed each day since the increase was first noticed, following the rainy season. Figures for the past week show 8,330,000 bushels marketed as compared to 3,311,000 bushels for the previous week; while loadings have likewise increased from 1,878,000 bushels to 5,384,000 bushels. At present time there are 26,540,000 bushels in store in country elevators along the lines of the C.N.R. and 46,435,000 bushels in store at all lakehead elevators.

## I know Something Good About You

Wouldn't this old world be better if the folks we meet would say, "I know something good about you?"

And then treat us just that way?

Wouldn't it be fine and dandy, if each handclasp, warm and true—

Carried with it this assurance, "I know something good about you?"

Wouldn't life be lots more happy, if the good that's in us all were the only thing about us That folks bothered to recall?

Wouldn't life be lots more happy, if we praised the good we see? For there's such a lot of goodness In the worst of you and me.

Wouldn't it be nice in practice? That fine way of thinking too? You know something good about me!

I know something good about you!
